UK Air Quality Zones Assessment Threshold Status

Five-year review (2019-2023)

March 2025

Version: C23914 - Issue 1

We are responsible for improving and protecting the environment. We aim to grow a green economy and sustain thriving rural communities. We also support our world-leading food, farming and fishing industries.

Defra is a ministerial department, supported by 34 agencies and public bodies.

Introduction4

Assessment Threshold status by zone (2019-2023)9

Introduction

A review of the UK's air quality zones and agglomerations against defined Assessment Thresholds has been undertaken in accordance with the Air Quality Standards Regulations (2010). The Air Quality Standards Regulations (2010) (AQSR) directly reference criteria and business rules from the European Air Quality Directive (AQD¹) and Fourth Daughter Directive (4DD)² to be used in this assessment. As a result, the method applied references the AQD where this is the most direct reference to the specific criteria applicable. Article 5 of the AQSR provides the requirement to assess defined air quality zones^{3,4} against assessment thresholds determined by Section A of Annex II of the AQD. Paragraph 2 of Article 5 requires this assessment to be reviewed at least once every five years. These requirements are also specified under Article 4, para.6 of the 4DD for metals (arsenic, cadmium and nickel) and PAHs, using benzo[a]pyrene (B[a]P) as the marker.

This document represents the five-year review of UK zones against those assessment thresholds covering the period 2019-2023. This is the first stage in a process to determine the number of monitoring sites required in the national network as defined in the AQSR. The assessment is based upon a combination of measured data from the UK's national networks⁵ and national air quality models⁶ - the same data that underpins the UK annual compliance reporting under the AQSR, published on the UK-Air⁷ website. This data determines which category each zone falls into relative to the assessment thresholds – below the Lower Assessment Threshold ('<LAT'), between the Lower Assessment Threshold and Upper Assessment Threshold ('LAT-UAT') or above the Upper Assessment Threshold ('>UAT'). The Assessment Thresholds are specified for each pollutant metric in Annex II of the AQD and 4DD, and are summarised in Table 1 and Table 2, respectively. Ozone has no specified Assessment Threshold but, for the purposes of determining a requirement to make measurements, uses exceedances of the Long Term Objective (LTO) over the course of five years, as shown in Table 3.

Table 1 Assessment Thresholds prescribed in Annex II of the Air Quality Directive

Pollutant	Metric	LAT	UAT
Sulphur Dioxide (SO₂)	24-hr mean	50 µg m ⁻³ (3 allowed)	75 µg m ⁻³ (3 allowed)
	Winter mean*	8 µg m ⁻³	12 µg m ⁻³
Oxides of Nitrogen (NO_x)	Annual mean*	19.5 µg m ⁻³	24 µg m ⁻³
Nitrogen Dioxide (NO₂)	1-hr mean	100 µg m ⁻³ (18 allowed)	140 µg m ⁻³ (18 allowed)
	Annual mean	26 µg m ⁻³	32 µg m ⁻³
Particulate matter (PM₁₀)	24-hr mean	25 µg m ⁻³ (35 allowed)	35 µg m ⁻³ (35 allowed)
	Annual mean	20 µg m ⁻³	28 µg m ⁻³
Particulate matter (PM_{2.5})	Annual mean	10 µg m ⁻³	14 µg m ⁻³
Lead (Pb)	Annual mean	0.25 µg m ⁻³	0.35 µg m ⁻³
Benzene (C₆H₆)	Annual mean	2 µg m ⁻³	3.5 µg m ⁻³
Carbon Monoxide (CO)	8-hr mean	5 mg m ⁻³	7 mg m ⁻³

* applicable in ecosystem areas only

Table 2 Assessment Thresholds prescribed in Annex II of the Fourth Daughter Directive

Pollutant	Metric	LAT	UAT
Arsenic (As)	Annual mean	3.6 ng m ⁻³	2.4 ng m ⁻³
Cadmium (Cd)	Annual mean	2 ng m ⁻³	3 ng m ⁻³
Nickel (Ni)	Annual mean	10 ng m ⁻³	14 ng m ⁻³
Benzo[a]pyrene (B[a]P)	Annual mean	0.4 ng m ⁻³	0.6 ng m ⁻³

Table 3 Ozone Long Term Objectives (LTO) prescribed in Annex VII Section C of the Air Quality Directive

Pollutant	Metric	LTO
Ozone (O₃)	8-hr mean	120 µg m ⁻³ (for health)
	AOT40	6000 µg m ⁻³ .h (for vegetation)

Assessment Threshold status by zone (2019-2023)

Table 4 shows the status of each UK zone and agglomeration according to the assessment thresholds set out for the period 2019-2023 for:

- SO₂
- NO_x and NO₂
- PM₁₀ and PM_{2.5}
- Lead
- Benzene
- CO
- Ozone

Table 5 shows the same information by zone for:

- Arsenic
- Nickel
- Cadmium
- B[a]P

Table 4 Summary of Assessment Threshold status by pollutant/metric for each UK zone (2019-2023) (AQD pollutants)
