

COMMITTEE ON CARCINOGENICITY OF CHEMICALS IN FOOD, CONSUMER PRODUCTS AND THE ENVIRONMENT

EFSA Consultation: “Request for scientific review of the methodologies available to assess the long-term toxicity and carcinogenicity of plant protection products and mixtures.”

1. EFSA has opened a consultation on a draft protocol for work to review methodologies available to assess long-term toxicity and carcinogenicity of plant protection products and mixtures attached at Annex A. Comments are limited to the contents of the draft protocol, with no data submissions.
2. The consultation is open until 21st November. The COC is invited to consider whether it wishes to respond to the consultation, and Members are requested to submit comments to the Secretariat in advance of the COC meeting, so that any collated COC response can be submitted in time for the deadline. Members are also welcome to submit comments in a personal capacity.

Questions for the Committee

3. Members are invited to consider the draft protocol and in particular:
 - i. Do Members consider that the COC should respond to the EFSA consultation?
