| Risk Description    | The product contains butane, isobutane and propane, which are flammable gases. If the product is dispensed on to a flame or other ignition source, or comes into contact with a naked flame, the foam may ignite causing burns to the user.                                                                                                                                                                                                     |
| Corrective Measures | <p>The Office for Product Safety and Standards (OPSS) suspended the sale of this product because of safety concerns while further investigations were carried out. The business voluntarily withdrew the product and arranged for its safe disposal. Consequently, the Suspension Notice was revoked on 17<sup>th</sup> June 2026.</p> <p>Consumers who have the affected product should check the batch number and contact their retailer.</p> |
