

Subsidised camelid parasitology testing

Miscellaneous & Exotic Farmed Species (MEFS) Expert Group
July 2026

APHA is offering subsidised worm egg and coccidial oocyst counting for camelids until 30 June 2027.

Camelid worm egg and coccidial oocyst counting

The test offered by APHA:

- is discounted to £7.20 per sample
- follows the Sensitive Improved Modified McMaster method ([TC0860](#))
- is a two-part process including saturated sodium chloride and saturated zinc sulphate floatation, which enables the detection of all significant nematode eggs and coccidia oocysts, including *Eimeria macusaniensis*, *Eimeria ivitaensis*, *Trichuris* species and *Nematodirus* species
- is sensitive to 10 eggs or oocysts per gram of faeces
- requires at least 4.5g of faeces (a heaped tablespoon)

How to send samples

Submit samples either:

- through the [Animal Disease Testing Service](#), using the free postage label generated
- directly to APHA's [Carmarthen Veterinary Investigation Centre](#) with a [general submission form](#)

You must:

- submit the samples through a veterinary surgeon
- indicate whether the samples are for monitoring or diagnostic purposes

- ensure the packaging conforms with postal regulations for Category B biological substances ([UN3373](#)) - do not submit samples in gloves

Other parasitology tests offered by APHA

APHA also offer discounted:

- fluke and camelid worm egg count package ([PC0864](#))
- differential staining for *Haemonchus* species eggs ([TC0777](#)) - this test is exclusively carried out by APHA, which enables prompt testing of worm egg count samples submitted to us

See the full [price list, guidance on sample and test selection, and submission forms](#).

If you have any queries, contact your [local Veterinary Investigation Centre](#).
