b) Address(es) and registration number(s) of premises of origin:

c) Address and registration number of hatchery:

III. Destination of the chicks

a) Name and address of consignee in Indonesia:

b) Means and identification of transportation:

V2.1255EHC APPLICATION

Certificate Number: .....

IV. Health Information

I, the undersigned Official Veterinarian, certify that the day-old chicks described above meet the following requirements:

a) The day-old chicks originated from and are kept in a *country, *zone, or *compartment within the United Kingdom that is officially free from Highly Pathogenic Avian Influenza (HPAI) and notifiable Low Pathogenic Avian Influenza (LPAI) in poultry according to the WOAH Terrestrial Animal Health Code;

b) The day-old chicks have not been vaccinated against HPAI;

c) The establishments of origin are officially registered with the UK competent authority;

d) The farm(s) from which the eggs or chicks were produced are under routine inspection by a UK-accredited or government veterinarian, and within the 6 (six) months preceding the pre-export inspection, there were no evidence of clinical symptoms of all the following infectious diseases: Low Pathogenic Avian Influenza (LPAI), Newcastle Disease (ND), Fowl Pox, Fowl Cholera, Infectious Bronchitis (IB), Infectious Laryngotracheitis (ILT), Infectious Synovitis, Infectious Bursal Disease (IBD), Egg Drop Syndrome, Ornithosis, Marek's Disease, Lymphoid Leucosis, Mycoplasmosis, Chronic Respiratory Disease (CRD), Swollen Head Syndrome, Chicken Anaemia Agent, Avian Nephritis, Leucocytozoonosis, Infectious Coryza, Avian Spirochaetosis, Avian Encephalomyelitis, Avian Salmonellosis (i.e. Avian Pullorum disease, Fowl Typhoid) and Avian Tuberculosis during the last 6 months prior to shipments;

e) The parent flocks are registered in the UK Salmonella National Control Program. The latest routine Salmonella testing indicated negative results;

f) Disinfection of hatching eggs and fumigation of hatchery equipment were routinely carried out prior to hatching;

g) The parent flock of the chicks has been vaccinated against Marek's disease;

h) *Either:
   a. The parent flock of the chicks has been vaccinated against coccidiosis with a method of vaccination approved by the competent authority of the United Kingdom;
   *Or:
   b. The parent flock of the chicks has not been vaccinated against coccidiosis;

i) On the day of shipment, the chicks were inspected by an Official Veterinarian to ensure there are no clinical signs of infection;
