| Risk Type                | Fire                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Risk Description         | <p>The product presents a high risk of fire as the plug fuse has insufficient granular filler and therefore does not meet the requirements of BS 1362. A compliant, correctly rated fuse is required to ensure the safe operation of the product under fault conditions. Should a fault occur, without granular filler the plug may overheat and ignite, causing a fire.</p> <p>The product does not meet the requirements of the Electrical Equipment (Safety) Regulations 2016 or the Plugs &amp; Sockets etc (Safety) Regulations 1994.</p> |
| Corrective Measures      | The import has been rejected at the border.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
