

CMA Levy

My response to the proposed Levies to fund the so called CMAs remedies to the perceived issues in the veterinary sector are as follows

The Government is meddling in a well functioning sector and wishes to promote corporate ownership of veterinary practices.

Its original mandate of looking at competition was abandoned and instead they focussed on medicine prices.

Their remedy is to force all independent practices to advise clients to buy their drugs from corporate owned practices

They want us now to pay for the regulation of this anticompetitive move they have forced on us in order to further reduce our ability to run small independent businesses.

HM governments current socialist agenda and their unelected quangos are not welcome and I look forward to their unemployment in 3 years time
