Issue

Reference A has been retired by the Sponsor, Defence Equipment and Support (DE&S) Digital Engineering Airworthiness Management (EAM) (Air) Fixed Wing (FW) Team Lead. MAA Regulatory Publications (MRP) documents referencing this publication are to be updated.

Scope

This Regulatory Notice (RN) covers the retirement of the Reference A and the process to transfer current, relevant and extant content into the Manual of Airworthiness Maintenance – Documentation (MAM-D) Part 1 – Governance and Guidance (MAM-D Part 1).

Aim

Those within the Regulated Community who use Reference A are requested to follow this RN.

Implementation

25 August 2026 to 25 November 2026 (3-month review period)

Background / Introduction

The scope of Reference A was intended to be specific policy for Maintenance Data System (MDS). Over time further policy and direction has been added to the publication. It has been correctly identified that this should not be held there but is within scope of the MAM-D Part 1.

The MAA understands MDS reporting is a reduced function and will be removed from the MAM-D Part 2 (Catalogue of MOD Forms), however applicability of other information within Reference A requires review before transfer to the MAM-D Part 1.

Transitional Arrangements

The Regulated Community is requested to complete the survey at the below link and consider whether the content of Reference A is still relevant and extant. The survey asks for a free text feedback comment on each section.

References to the JAP100C-02 within the MRP will be replaced during the standard review cycle, no later than August 2028.
