

Armed Forces Pension Forms

A practical guide to the most commonly used forms for applications, forecasts, added pension and life events

Choose the right form for the action you need to take

FORM 1

Active Serving AFPS Application

For eligible serving personnel applying for their Armed Forces Pension. The form is returned by post and is also required when using overseas pension payment mandate forms.

FORM 2

Death Benefit Nomination / Revocation

For AFPS 05 and AFPS 15 members who want to nominate a recipient for an eligible death lump sum, or replace or revoke an existing nomination. Nominations should be kept under review after major life events.

FORM 6

Added Pension Quotation

For eligible AFPS 15 members who want an official quotation showing the cost of buying Added Pension. The online Added Pension Calculator is useful for illustrations, but Form 6 starts the official quotation process.

FORM 6A

Added Pension Application / Changes

Used to enter an Added Pension contract following a quotation, or make permitted changes or cancellations. Consider affordability before committing to additional payments.

FORM 8

Preserved Pension Application

For former members claiming preserved pension benefits when they become payable. Preserved pensions are not always paid automatically, so it is important to claim at the appropriate time.

FORM 12

Serving Personnel Pension Forecast

For serving personnel who want a personalised forecast of future pension benefits. It is useful when considering leaving dates or retirement plans, but it is not an RSS and should not be used to compare McCloud remedy options.

FORM 14

Deferred / Preserved Pension Forecast

For former personnel who want a forecast of pension benefits retained after leaving service. A digital deferred pension forecast service may also be available through GOV.UK.

FORM 19

Divorce / Dissolution Pension Information

For pension information or valuations required in divorce or dissolution proceedings. Charges can apply to some calculations, and McCloud may affect relevant pension values.
