

Zebra Prescription Printer Power Supply Units

Aspect	Details
Images	
PSD Number	2607-0208
Product Type	Electrical appliances and equipment - Extension/Power Supply Cords
Product Identifiers	Model: GK420d Range of Desktop Printer models that may be affected: APxxx, GC4xxx, GK4xxx, GK888xx, GX4xxx, GT8xx, HC100, H/LP/TLP/Rxxxx (282x, 284x, 384x), PS4000, T2xxx, Thermal 284x, ZP4xx, ZP5xx Range of Card Printer models that may be affected: BR1xxx, CN1xxx, J1xxx, P1xxx, SC1xxx, WM1xxx, ZXP Series 1, ZXP Series 3x Power Supply Unit supplied by FSP Group.
Product Description	The product is a power supply unit supplied for a specialised printing device designed for healthcare environments to produce legal, highly legible medical prescriptions, repeat re-order forms, or drug dispensing labels.
Country of Origin	United Kingdom
Counterfeit	No
Risk Level	High
Risk Type	Fire
Risk Description	The products present a risk of fire occurring at the power lead where it enters the appliance. PSUs that serve as the power source for the above-named models of Zebra printers have been identified as potentially containing an improperly mixed phosphorus compound that is used in the flame retardant resin in the DC power supply connectors. This deficiency in the phosphorus based connector resin, when combined with moisture and humidity over time, can potentially lead to overheating or a fire hazard. The product was placed on the market before the Electrical Equipment (Safety) Regulations 2016 came into force and therefore the Electrical Equipment (Safety) Regulations 1994 duties apply. The PSU does not comply with the core requirements outlined in

The OPSS Product Safety Alerts, Reports and Recalls Site can be accessed at the following link: <https://www.gov.uk/guidance/product-recalls-and-alerts>

Product Recall

	Regulation 5 and Schedule 3 of the Electrical Equipment (Safety) Regulations 1994 specifically related to the general requirement to be "Safe" and for Protection Against Hazards (Non-Electrical) and Resistance to External Influences.
Corrective Measures	The product was subject to a product recall in 2016. The recall period has been expanded to include PSUs manufactured between October 1, 2006 and December 31, 2012. Users are advised to check if their PSU is affected and refer to the manufacturer's recall page for further information: Power Supply Unit Voluntary Recall Zebra Zebra.
