MERCHANT SHIPPING NOTICE

MSN 1874 (M+F) Amendment 12

Marine Equipment – United Kingdom conformity assessment and type approval procedures for marine equipment.

Notice to all: Manufacturers and Distributors of Marine Equipment, Masters, Officers and Skippers of: Merchant Ships, Fishing Vessels, Small Commercial Vessels and Pleasures Vessels, Ship Builders, Designers, Operators, Owners and Managers, Marine Consultants, Recognised Organisations, Certifying Authorities and Approved and Nominated Bodies
This Notice should be read with the Merchant Shipping (Marine Equipment) Regulations 2025, SI 2025/1280 ("the Regulations"). This Notice replaces MSN 1874 (M+F) amendment 11.

Summary

This Notice has been given force of law by Statute (SI 2025/1280) as amended.

The objective of the Regulations is to enhance safety at sea and prevention of pollution to the marine environment through the uniform application of the relevant international instruments relating to equipment to be placed on board ships registered with the UK.

This Notice gives technical information and guidance about the procedures for obtaining type approval in conformity with the Regulations. It also gives information regarding the United Kingdom's policy for enforcing these requirements, and other standards to be applied to equipment on board United Kingdom ships.

This Notice replaces Merchant Shipping Notice 1874 (M+F) amendment 11 in view of amendments to the Regulations (as originally enacted) to operate effectively and other deficiencies arising from the withdrawal of the United Kingdom from the European Union.

1 Introduction

- 1.1 The Merchant Shipping (Marine Equipment) Regulations 2025 SI 2025/1280 ("the Regulations") and this Notice sets out performance and testing standards to be met by marine equipment placed or to be placed on board a UK ship in accordance with the UK's conformity assessment procedures, as detailed in Part I of this Notice.

- 1.1.1 This Notice also sets out type approval procedures for equipment placed or to be placed on board UK ships which is outside the scope of the UK's conformity assessment procedures for marine equipment, but which requires conformity approval by various UK instruments. Such type approvals are carried out by nominated bodies in accordance with the procedures in Part II of this Notice.
- 1.1.2 Vessels are required to install on board UK approved marine equipment, however, in situations where this is not possible, a three-step approach to allow fitting of non-UK conformity marked equipment on board a UK vessel is detailed in 1.1.2 (i) to (iii)
 - i. Owners/operators/masters are advised of the requirement and expectation to procure and fit UK approved equipment on board a UK registered vessel, or.
 - ii. Equipment approved by the United States Coast Guard (USCG) under the UK/US Mutual Recognition Agreement (MRA) as detailed in Annex 6 to this notice is accepted and can be placed on board a UK registered vessel.
 - iii. If it is not possible to comply with 1.1.2 (i) and (ii), the owner/operator/master should liaise with their MCA Customer Service Manager to request the MCA approves their proposal to fit non-UK or US approved equipment listed in Annex 6, which has equivalent international approval (eg: EU MED or Type approval) and consider issuing a 'Letter of Acceptance'.
- 1.2 Further, this Notice sets out the technical standards for equipment requiring type approval for which the carriage requirement does not provide for a specific standard.
- 1.3 This Notice is split into three parts, covering three overarching categories of equipment.
 - 1.3.1 Part I, sets out the equipment within the scope of the UK's conformity assessment procedures for marine equipment and the associated technical requirements to which equipment must be approved by an approved body.
 - 1.3.2 Part II, sets out the requirements for equipment that falls outside the scope of the UK's conformity assessment procedures for marine equipment but nonetheless requires approval of the Maritime & Coastguard Agency ("MCA") as the flag administration for UK ships under the international instruments, and equipment required to be approved in accordance with other UK domestic instruments; and
 - 1.3.3 Part III sets out technical standards and arrangements for other equipment, where there is no specified standard for such equipment in existing UK instruments.
- 1.4 Interpretation:
 - In this notice:
 - 1.4.1 "The Regulations" shall mean the Merchant Shipping (Marine Equipment) Regulations 2025 SI 2025/1280.
 - 1.4.2 Where a specific regulation is cited, unless specifically stated otherwise, this shall be construed as reference to a regulation within the Regulations.
 - 1.4.3 Where the term "Part" is used in relation to Part I, II or III of this Notice, this refers to the respective part of this Notice.
 - 1.4.4 Unless expressly stated otherwise, a term used in this Notice shall have the same meaning as defined in regulation 2 of the Regulations.

Part I – Equipment within scope of the UK conformity assessment procedures for marine equipment

- 2. **Scope of equipment approval according to the UK conformity assessment procedures for marine equipment**

- 2.1 Equipment within the scope of Part I is that which is required by the international instruments and must be approved by the flag State administration of the relevant ship, as provided for in regulation 5(1).
- 2.2 Equipment to which Part I applies must be approved by one or more approved bodies. For more information regarding the approval procedure and/or the application of requirements of such equipment, an approved body which may assess the relevant equipment should be contacted. A full list of approved bodies can be found in paragraph 5.2 of this Part.
- 2.3 Manufacturers with existing approval certificates in accordance with the EU Marine Equipment Directive (Directive 2014/90/EU on marine equipment) ("MED") were, until 1 January 2023, able to make their equipment available to the UK market and be placed on board UK ships as provided for in regulation 5 (provided MED and UK standards remained equivalent). However, from 1 January 2023, this is no longer accepted.
- 2.4 MED approved marine equipment placed on board a UK flagged vessel before 1 January 2023 can remain on board for the duration of its operational life and only when items are replaced, after 1 January 2023, must they be replaced with UK approved marine equipment in accordance with the requirements in this MSN. This means that MED approved equipment that is on board a UK flagged vessel prior to the 1 January 2023 can remain on board until the end of the equipment's operational life. For example, if a piece of MED approved equipment was on board a UK flagged vessel prior to 1 January 2023 and then reached the end of its operational life after 1 January 2023; it would need to be replaced with UK approved marine equipment thereafter.
- 2.5 Additionally, MED approved marine equipment that has been manufactured **before 1 January 2023** can continue to be placed on board United Kingdom ships as if it was a United Kingdom approved piece of marine equipment, subject to the timeframes around placing on board outlined elsewhere in this notice. If such equipment has been manufactured after 1 January 2023, then it must be UK approved or approved by the US Coast Guard for items of marine equipment that fall within Annex 6.

3 Requirements for equipment to be placed on board a UK ship

- 3.1 Equipment placed on board a UK ship to which this Part applies must meet the design, construction and performance requirements of the international instruments detailed in Annex 1 of this Notice applicable at the time when that equipment is placed on board in accordance with regulation 5(1).
- 3.2 Unless there is a change in the applicable standards specified in Annex 1 of this Notice for equipment already placed on board a UK ship, existing approval will continue to be accepted providing equipment continues to operate in accordance with its existing approval. If equipment is replaced, it must be replaced with equipment which complies with the Regulations.

4 Domestic passenger ships and large fishing vessels

- 4.1 As required by regulation 5(2), where equipment is specified in Annex 1 of this Notice, a domestic passenger ship or fishing vessel must carry equipment that complies with applicable international standards, except where a carriage requirement provides for an alternative standard. The carriage requirements are listed in Annex 4 of this Notice.

5 UK Approved Bodies

- 5.1 The MCA has designated organisations listed below as approved bodies for the purpose of carrying out approvals of equipment to undertake the examination, testing and certification of the equipment specified in Annex 1 of this Notice.
- 5.2 For information regarding the equipment types and modules of conformity an approved body may perform, the specific body must be contacted.

Apragaz Shearway Road Folkestone CT19 4RH B.Neve@apragaz.com	BSI Assurance UK Ltd Kitemark Court, Davy Avenue Knowhill, Milton Keynes MK5 8PP Tel: +44(0) 845 080 9000 Richard.gurney@bsigroup.com

5.3 Approved Bodies must meet the requirements of Schedule 3 of the Regulations and will be assessed at least once every 2 years to confirm compliance with these requirements. The

United Kingdom Accreditation Services (UKAS) as the national accreditation body is delegated this assessment responsibility. Further information and guidance are available for conformity assessment bodies wishing to be designated as an approved body in Marine Guidance Note 554 (M+F) Amendment 2.

- 5.4 The MCA is responsible for designating approved bodies on behalf of the Secretary of State. For this purpose, the MCA can be contacted at the following address:

UK Technical Services Ship Standards
Maritime and Coastguard Agency
Spring Place, 105 Commercial Road
Southampton SO15 1EG
Email: MEQA@mcga.gov.uk

6 UK Market surveillance

- 6.1 The MCA, on behalf of the Secretary of State for Transport, is the market surveillance authority for equipment and is required to carry out market surveillance. Approved Bodies, manufacturers and manufacturers' authorised representatives must cooperate with MCA market surveillance inspectors as indicated in this Part and in accordance with the Regulations. Market surveillance seeks to ensure the safety of products offered for supply to the UK market and UK ships. Such market surveillance will take into consideration the conformity assessment procedures applicable to equipment and the responsibilities of the flag State administrations in the international instruments.
- 6.2 Market surveillance may include the inspection of documents supplied with equipment to confirm its compliance as well as checks of equipment specified in regulation 5(1), whether or not it has been placed on board a UK ship. Where checks are carried out on equipment placed on board a UK ship, such checks will be limited to examinations that can be carried out while the equipment remains fully functional on board.
- 6.3 When the MCA has received evidence to suggest equipment specified in Part I may not be in compliance with the international instruments and/or poses a risk to the safety of persons on board UK ships or the marine environment it may seek further evidence by carrying out sample checks of such equipment. Accordingly, the MCA may request the manufacturer to provide the necessary samples at the manufacturer's own cost or give on-the-spot access to the samples at the manufacturer's premises.
- 6.4 Where the MCA has sufficient reason to believe that equipment to which this Part is applicable presents a risk to maritime safety, to health or to the environment, it may carry out an evaluation in relation to the equipment concerned covering all the requirements for such equipment. The relevant economic operators must cooperate as necessary with the MCA in accordance with the Regulations. Additionally, the MCA may inform the public on the potential risk via the publication of safety bulletins etc.
- 6.5 Where the MCA finds that, subject to the evaluation in 6.4, the equipment does not comply with the requirements in this Part, the MCA may without delay require the relevant economic operator to take all appropriate corrective actions to bring the equipment into compliance with those requirements, using existing powers in the Merchant Shipping Act 1995 by way of an Improvement or Prohibition Notice. This will be commensurate with the nature and extent of the risk which the MCA considers is posed by the equipment, as it may prescribe, or any other corrective measure justified by the MCA. The MCA will inform the relevant approved body accordingly. Where the economic operator does not carry out such corrective measures within the timeframe specified by the MCA, the MCA may initiate such appropriate measures as are necessary to prohibit or restrict non-compliant equipment from being supplied to the UK market or placed on board UK ships.
- 6.6 Where it is considered that non-compliance may not be limited to the UK market, the MCA may inform other parties to the international instruments flag administrations and

international organisations to include the nature of the non-compliance and the corrective actions which has been implemented.

PART II – Approved equipment outside the scope of the UK’s conformity assessment procedures but requiring approval under international instruments or other UK domestic instruments

7 Scope of Approval

- 7.1 Equipment to which this Part applies is that equipment outside the scope of the UK’s conformity assessment procedures for marine equipment but nonetheless requires approval by the MCA as the UK flag administration. This equipment, listed in Annex 2, must be type approved by the UK Nominated Bodies.
- 7.2 Where equipment within the scope of this Part is of a novel nature or subject to significant design changes or the specifications or testing requirements are not considered to be sufficiently developed or experience of their usage is limited, the MCA must be contacted regarding the undertaking of the necessary approval procedure. For this purpose, the MCA contact details in paragraph 5.4 above should be used. This is in addition to also contacting a relevant Nominated Body.

8 Requirements for equipment

- 8.1 Equipment which is placed on board a UK ship to which this Part applies must hold a valid type approval certificate issued by a nominated body at the time when that equipment is placed on board.
- 8.2 The performance and testing standards of equipment within the scope of this Part are specified in Annex 2 of this Notice. In consultation with the MCA, a nominated body may waive the requirements for any test specifically cited in a performance standard providing it is satisfied that the sample has met the criteria of a specification superior to that of the prescribed test.
- 8.3 Existing type approval certificates for equipment within the scope of this Part will remain valid before the certificate’s expiry date, or until cancelled. Upon the expiry date of the certificate, manufacturers must re-apply for renewal of their certificate to a nominated body. If requirements have not changed a new certificate will be issued. All certificates of type approval will be valid for up to 5 years.
- 8.4 Unless there is a change in the required standards specified in Annex 2 of this Notice applicable to equipment already placed on board a UK ship, existing approval will continue to be accepted providing the equipment operates satisfactorily. If it needs to be replaced, then it must be replaced with equipment for which a current type approval certificate is in force.

9 Domestic passenger ships and large fishing vessels

- 9.1 As required by regulation 5(2), where equipment is specified in Annex 2 of this Notice, a domestic passenger ship or fishing vessel must carry equipment that has been approved by a nominated body, except where a carriage requirement provides for an alternative standard to be met. The carriage requirements are listed in Annex 4 of this Notice.

10 Application for type approval

- 10.1 A manufacturer or person wishing to obtain type approval of equipment specified in

Annex 2 of this Notice must submit an application to a nominated body, in accordance with Part 4 of the Regulations. The application must include:

- 10.1.1 The name and address of the manufacturer and, if the application is lodged by an authorised representative, their name and address.
- 10.1.2 A written declaration that the same or a similar application has not been lodged with another nominated body.
- 10.1.3 The technical documentation described in 10.3 below; and
- 10.1.4 The applicant must place at the disposal of the nominated body, sufficient specimens representative of the production envisaged. The nominated body may request further specimens if needed for carrying out the test programme.
- 10.2 The technical documentation must enable a nominated body to type approve the product with the requirements and testing standards specified in Annex 2 of this Notice. It must cover the design, build standards, manufacturer and functioning of the equipment, as far as relevant.
- 10.3 The technical documentation must contain all relevant data or means used by the manufacturer to ensure that the equipment complies with the essential requirements relating to it. It must also enable understanding of the design, manufacture and operation of the product and its type approval as per the relevant requirements.
- 10.4 The documentation shall contain so far as is relevant for assessment:
 - 10.4.1 A general description of the equipment.
 - 10.4.2 Conceptual design and manufacturing drawings and schemes of components and relevant supporting drawings.
 - 10.4.3 Descriptions and explanations necessary for the understanding of the drawings and schemes including operation of the equipment.
 - 10.4.4 Results of design calculations made, impartial examinations carried out etc.
 - 10.4.5 Impartial test reports; and
 - 10.4.6 Manuals for installation, use and maintenance.
- 10.5 Where appropriate, the design documentation must contain the following elements:
 - 10.5.1 Attestations relating to the equipment incorporated in the appliance.
 - 10.5.2 Attestations and certificates relating to the methods of manufacture and/or inspections and/or monitoring of the appliance; and
 - 10.5.3 Any other document making it possible for the nominated body to improve its assessment.

11 Assessment of type approval

- 11.1 On receipt of an application for type approval in accordance with paragraph 10 above, a nominated body must:
 - 11.1.1 Examine the technical documentation and verify that the equipment has been manufactured in conformity with the technical documentation;
 - 11.1.2 Agree with the applicant the location where the examination and necessary tests are to be carried out; and
 - 11.1.3 Perform or have performed the appropriate examination and necessary tests to check whether the relevant requirements specified in Annex 2 are complied with.
- 11.2 Type approval tests must be conducted at a laboratory accredited for such tests by the UKAS or equivalent national accreditation body. However, if no such laboratory is available, a laboratory recognised by the nominated body as offering suitable and satisfactory

- guarantee of technical and professional competence, quality procedures and autonomy with particular reference to the application of ISO/IEC 17025 (2017), as amended may be used.
- 11.3 Where the equipment meets the provisions of the relevant requirements specified in Annex 2 of this Notice and test and performance standards, the nominated body must issue a certificate of type approval to the applicant. The certificate must contain the name and address of the manufacturer, details of the equipment, conclusions of the examination, conditions for its validity and the necessary data for identification of the approved type.
- 11.4 A list of the relevant parts of the technical documentation including drawings and instructions must be annexed to the certificate and a copy kept by the nominated body.
- 11.5 If the manufacturer is refused a certificate of type approval, the nominated body must provide detailed reasons for such refusal in writing, to the applicant for type approval.
- 11.6 Where an application is rejected after completion of the type approval procedure, the manufacturer must modify the equipment to take account of the reasons for rejection before making a new submission to the nominated body. In the manufacturer's application to the nominated body they must include:
- 11.6.1 the original examination and test results.
- 11.6.2 the detailed reasons provided by the nominated body for the previous refusal; and
- 11.6.3 details of all modifications made to the equipment since the previous application.
- 11.7 Upon receipt of the re-submission of the application for type approval, the nominated body must re-open the approval procedure.
- 11.8 The applicant must inform the nominated body that holds the technical documentation concerning the certificate of type approval of all modifications to the approved product which must receive additional approval where such changes may affect the conformity with the requirements or the prescribed conditions for use of the equipment. This additional approval must be given in the form of an addition to the original certificate of type approval.

12 Issue of type approval

- 12.1 Providing that a nominated body is satisfied that the equipment complies in all respects with the requirements in Annex 2 of this Notice and any specifications laid down by the MCA and subject to the provisions below, the nominated body must issue a certificate of type approval stating the terms and conditions of approval and period of validity which must be up to 5 years.
- 12.2 A certificate of type approval refers only to equipment identical to that assessed. It is also a condition of issue of the certificate that a manufacturer must consult with the nominated body prior to any alteration to the approved standard of the equipment, hardware, software or firmware.
- 12.3 The nominated body may require further testing and assessment to be undertaken in the event of a modification, or series of modifications, being considered to constitute sufficient departure from the approved standard of the equipment hardware, software or firmware for which the certificate of type approval was originally issued.
- 12.4 The certificates of type approval and/or their additions and annexes to the certificates, technical documentation, other documentary evidence used to type approve the equipment must be kept at the disposal of the MCA and other nominated bodies for a period of not less than 10 years after the last product has been manufactured.
- 12.5 The manufacturer or his authorised representative shall keep with the technical documentation copies of certificates of type approval and their additions for a period of at least 10 years after the last product has been manufactured.

- 12.6 Where a Nominated Body grants type approval for a ballast water management system (BWMS), it must provide a type approval report to the MCA by e-mail to environment@mcga.gov.uk. Type approval reports provided by Nominated Bodies in respect of BWMS must contain the information specified in Part 7 of the Annex to the Ballast Water Management Systems (BWMS) Code. On issuance of type approval for a BWMS by a Nominated Body (issuing on behalf of the UK Administration), the MCA will notify the IMO as required by paragraph 6.10 of the BWMS Code and further detailed in Part 7 of the Annex to the BWMS Code.
- 12.7 Where a Nominated Body grants type approval for any product listed in annex 2, other than those detailed in 12.6, it must provide a type approval report to the MCA by e-mail to MEQA@mcga.gov.uk including details of the category of marine equipment, manufacturer, product name, date of approval and expiry, together with a copy of the certificate issued.

13 Nominated Bodies

- 13.1 Nominated Bodies are those bodies which have been designated by the Secretary of State to carry out type approval of equipment placed on board UK ships under regulation 4 of the Regulations. The designated UK nominated bodies are listed below.

Bureau Veritas Bureau Veritas 206 Fort Dunlop, Fort Parkway Birmingham B24 9FD Email: marineequipment.paris@bureauveritas.com	DNV UK Ltd Vivo Building, 30 Stamford Street London SE1 9LQ Technical Manager for DNV UK Ltd Mark.Hayward@DNV.com MER Mailbox: UKMER@DNV.com
Lloyd's Register Global Technology Centre Hampshire Hse, Hampshire Corporate Park Southampton SO53 3RY Tel: +44(0)330 414 0425 Email: mer.lrm@lr.org	RINA UK Ltd 3 rd Floor, Cumberland House 15-17 Cumberland Place Southampton SO15 2BG Email: richard.pietruszka@rina.org
TUV SUD BABT Unlimited Octagon House, Concorde Way, Segensworth North Fareham PO15 5RL Email: babt@tuvsud.com	

- 13.2 Each nominated body must provide upon request to the MCA and other nominated bodies the relevant information concerning the certificates of type approval and additions issued and withdrawn.

Part III – Other equipment standards

- 14 Scope of equipment standards and requirements
- 14.1 Equipment within this Part is equipment required by UK instruments and specified in Annex 3 of this Notice, but where no standard for such equipment is specified to provide an acceptable level of safety to domestic ships outside the scope of the international conventions. This equipment may not be of an approved type and in all cases must comply with the relevant standard specified in Annex 3 of this Notice.
- 15 Requirements for equipment

- 15.1 Equipment specified in Annex 3 of this Notice and placed on board a UK ship to which this Part applies in accordance with regulation 5(3) must meet the design, construction and performance requirements of the standards in Annex 3 valid at the time the equipment is placed on board. Annex 3 of this Notice also sets out the ship type to which each specified standard is applicable.

Annex 1

This annex sets out in full the design, construction and performance requirements and testing standards for marine equipment to which approval by an approved body is required in accordance with regulation 5.

The requirements below replace those in Merchant Shipping Notice 1874 (M+F) amendment 11.

General note: references to 'SOLAS' Regulations refer to the provisions of the International Convention for the Safety of Life at Sea, as amended.

List of acronyms used

A.1	Amendment 1 concerning Standard Documents other than IMO
A.2	Amendment 2 concerning Standard Documents other than IMO
AC	Amending Corrigendum concerning Standard Documents other than IMO
CAT	Category for radar equipment as defined in section 1.3 of IEC 62388
Circ.	Circular
COLREG	Convention on the International Regulations for Preventing Collisions at Sea, 1972
COMSAR	IMO Sub-Committee on Radiocommunications and Search and Rescue
EN	European Standard
ETSI	European Telecommunication Standardisation Institute
FSS	International Code for Fire Safety Systems
FTP	International Code for Application of Fire Test Procedures
HSC	High Speed Craft Code
IBC	International Bulk Chemical Code

O ₂ /HC systems	Oxygen Hydro Carbon systems
SOLAS	International Convention for the Safety of Life at Sea, 1974
SOx	Sulphur Oxides
Reg.	Regulation
Res.	Resolution

Notes applicable to the whole of this Annex.

- (a) General: In addition to the testing standards specifically referred to in this Annex, type-examination (type approval) requires compliance with the applicable requirements of the international conventions and the relevant resolutions and circulars of the IMO. Such compliance is referred to in the modules for conformity assessment in the Regulations.
- (b) Column 3: Where two sets of testing standards are separated by 'or', each set fulfils all the testing requirements to meet IMO Performance Standards; thus testing to one of those sets is sufficient to demonstrate compliance with the requirements of the

- (c) relevant international instruments. On the contrary, when other separators (such as comma) are used all the listed references apply.
- (d) Column 6: In order to take into consideration timeframes for shipbuilding, depending on the characteristics of the specific marine equipment, the meaning of 'placing on board' is:
- I : first installation of the equipment in its functional position on board a UK ship;
 - II : first installation of the equipment in its functional position or stowing in its functional position on board a UK ship;
 - III: delivery of the equipment to the shipyard if this takes place within 30 months before the first installation of the equipment in its functional position.
- (e) Where there is more than one row for one marine equipment entry (e.g. UK/3.12), the last (lowest) row contains the updated requirements of the international instruments in respect to the ones shown in the upper row or rows.
- (f) In the situations referred to in point (d) where no date is given in columns 5 and 6, this indicates that there has been no change in the testing standards and that the marine equipment item concerned shall comply with the requirements indicated in the last (lowest) row.

9. Equipment for which the set of standards for UK certification is not complete

Note applicable to section 9: A set of standards for UK certification is deemed to be complete where:
IMO Provisions for:

- Type approval
- Carriage requirements and
- Testing standards

9.1 Life-saving appliances

No.	Item Description
UK/9/1.3	Float-free launching appliances for survival craft
UK/9/2.3	Equipment using other equivalent methods to reduce on board NOx emissions
UK/9/2.4	Equipment using other technological methods to limit Sox emissions
UK/9/2.5	On board NOx analyzers using a measurement method other than the direct measurement and monitoring method of the NOx Technical code 2008

9.2 Marine pollution prevention equipment

No.	Item Description
UK/9/2.3	Equipment using other equivalent methods to reduce on board NOx emissions
UK/9/2.4	Equipment using other technological methods to limit SOx emissions
UK/9/2.5	On board NOx analyzers using a measurement method other than the Direct Measurement and Monitoring Method of the NOx Technical Code 2008

9.3 Fire protection equipment

No.	Item Description
UK/9/3.9	Protective clothing resistant to chemical attack
UK/9/3.74	Alcohol resistant foam system – Added by MSN 1874 amendment 7
UK/9/3.75	Flexible hoses suitable for methyl/ethyl alcohol for fuel piping systems – Added by MSN 1874 amendment 7
UK/9/3.76	Vapour outlets suitable for methyl/ethyl alcohol fuel tanks – Added by MSN 1874 amendment 7

9.4 Navigation equipment

No.	Item Description
UK/9/4.20	Track control system for - high-speed craft
UK/9/4.22	QZNSS Quasi Zenith Satellite System (Note: QZNSS only together with GPS, GLONASS, Galileo and Beidou)
UK/9/4.66	Nautical publications in digital form as defined by SOLAS V/27

9.5 Radiocommunication equipment

No.	Item Description
	No items listed under this category

9.6 Equipment required under COLREG 72

No.	Item Description
UK/9/6.4	Two-way voice and data communication with a Telemedical Assistance Service (TMAS)
UK/9/6.5	Sound signaling system mounted to face astern to indicate escort and emergency manoeuvres

9.7 Other safety equipment

No.	Item Description
	No items listed under this category

9.8 SOLAS Chapter II-1 equipment

No.	Item Description
	No items listed under this category

ANNEX 2

This Annex sets out equipment that requires approval by a ship's Flag Administration, but which is not within the scope of the UK's conformity assessment for marine equipment. The table below sets out the relevant Regulations of the applicable IMO Convention and performance standards and applicable testing standards. Such equipment is to be type approved by a Nominated Body. Similar to Annex 1, equipment is grouped into categories (Life-Saving Appliances, Pollution Prevention, BWMS, Fire Protection, Navigation, Radio communication and equipment required by COLREG).

This Annex also specifies other equipment which is to be approved by a Nominated Body.

Note applicable to this entire Annex: Where no testing standard is stated in column 4 of the relevant table for equipment in question, the testing standard is to be agreed between the relevant Nominated Body and the MCA ahead of the type approval regime being agreed with the applicant for type approval.

Reporting - Where a Nominated Body grants type approval it must.

- a) BWMS - provide a type approval report to the MCA by e-mail to environment@mcga.gov.uk.
(Type approval reports provided by Nominated Bodies in respect of BWMS must contain the information specified in Part 7 of the Annex to the BWMS Code. On issuance of type approval for a BWMS by a Nominated Body (issuing on behalf of the UK Administration), the MCA will notify the IMO as required by paragraph 6.10 of the BWMS Code and further detailed in Part 7 of the Annex to the BWMS Code).
- b) All other products listed in annex 2 - provide a type approval report to the MCA by e-mail to MEQA@mcga.gov.uk
The report must contain details of the product, manufacturer and date granted.

1. Life-saving appliances

No items currently listed in this section

"Public address & general emergency alarm system (when used as fire alarm device item UK/3.53 in Annex 1 shall apply): item moved to UK/1.44a and UK/1.44b in Annex 1 of this Notice by MSN 1874 amendment 7.

2. Marine pollution prevention

Item designation	International regulation, as amended, where “type approval” is required	International regulation as amended and relevant resolutions and circulars of the IMO as applicable	Testing standards

Other – Crew accommodation equipment

Item designation

Vacuum discharge piping systems

Thermostatic mixing valves

Plant used to produce drinking water and/or fresh water

Annex 3

This annex sets out equipment within the scope of part III of this Notice. This is equipment which does not require approval. This is equipment to which an explicit standard is not cited in UK instruments forming a carriage requirement.

The table below sets out minimum standards for acceptance on board the relevant UK ship listed in column 2. Column 1 states the item designation and column 3 states the minimum standard. When a minimum standard is not indicated, MCA will develop minimum standards through a separate MGN to be included in updates to this Notice. A ship carrying equipment which exceeds these minimum standards will be taken as meeting these standards.

Item designation	Applicable ships	Standard
Firefighter's radios	UK Class I – II(A) VII – VIII(A) as required by SOLAS Reg II-2 paragraph 10.4	The two-way portable radiotelephone apparatus shall be of an explosion- proof type or intrinsically safe. In order for such equipment to meet the explosion proof or intrinsically safe requirements, the radio telephone apparatus are to be certified in accordance with relevant standards for equipment and protective systems intended for use in potentially explosive atmospheres, and maintained as such, for example:- Directive 94/9/EC (ATEX) - with approval rating such as II2G Ex ib IIA T3; or IEC 60079-0 2009 - Electrical apparatus for explosive gas atmospheres - Classification of areas; or IEC 60092-502 1999 - Electrical installations in ships - Tankers – Special features.

Item designation	Applicable ships	Standard
		Intrinsically safe radios should have a power output of 1 watt or less. The radio telephone apparatus are to be fit for purpose, i.e. they are able to work within the environment to be expected in a fire scenario, that their operating range is sufficient and that they are safe.
Fixed fire extinguishing	Fishing <15m	MSIS 12

Annex 4

Carriage requirements

The following instruments are those mentioned in the Regulations which form carriage requirements for Domestic Passenger Ships and Fishing Vessels to carry equipment which meets a standard other than the applicable international standards.

Instruments applicable to domestic passenger ships certificated to operate on category C waters or seaward of that limit:

- MSN 1823 (M) - The Safety Code for Passenger Ships Operating Solely in UK Categorised Waters and SI 2010 No. 680
- MSN 1823 (M) Edition 2 – The Safety Code for Passenger Ships Operating Solely in UK Categorised Waters, Ed 2, Amdt 1
- The Small Sea Going Passenger Ship Code (A Code for Ships of Class VI)
- The Merchant Shipping (Passenger Ships on Domestic Voyages) Regulations 2000, SI 2000 No. 2687
- The Merchant Shipping (Life-Saving Appliances and Arrangements) Regulations 2020, SI 2020 No. 501
- The Merchant Shipping (Life-Saving Appliances for Passenger Ships Of Classes III To VI(A)) Regulations 1999 SI 1999 No. 2723
- The Merchant Shipping (Fire Protection: Small Ships) Regulations 1998 SI 1998 No. 1011
- The Merchant Shipping (Fire Protection: Large Ships) Regulations SI 1998 No. 1012
- The Merchant Shipping (Fire Protection) Regulations 2023, SI No. 568
- The Merchant Shipping (Prevention of Pollution by Sewage from Ship) Regulations SI 2020, No 620
- The Merchant Shipping (Prevention of Pollution by Garbage from Ships) Regulations SI 2020, No 621
- The Merchant Shipping (Prevention of Air Pollution from Ships) Regulations 2008, SI 2008 No. 2924
- The Merchant Shipping (Prevention of Oil Pollution) Regulations 2019, SI 2019 No. 42
- The Merchant Shipping (Distress Signals and Prevention of Collisions) Regulations SI 1996 No. 0075
- The Merchant Shipping (Safety of Navigation) Regulations 2020 SI 2020 No. 0673
- The Merchant Shipping (Radio Installations) Regulations 1998 SI 1998 No. 2070

Instruments applicable to fishing vessels of 24 metres length or over:

- The Fishing Vessels (Codes of Practice) Regulations 2017 No. 943
- The “Code of Practice for the Safe Construction and Operation of Fishing Vessels of 24 metres Registered Length and Over”
- The Merchant Shipping (Distress Signals and Prevention of Collisions) Regulations SI 1996, No. 75
- The Merchant Shipping (Prevention of Oil Pollution) Regulations 2019 S.I. 2019 No. 42

- The Merchant Shipping and Fishing Vessels (Personal Protective Equipment) Regulations SI 1999, No. 2205
- The Merchant Shipping (Safety of Navigation) Regulations SI 2020 No.673
- The Merchant Shipping (Prevention of Air Pollution from Ships) Regulations SI 2008 No 2924
- The Merchant Shipping (Prevention of Pollution by Sewage from Ships) Regulations SI 2020, No 620
- The Merchant Shipping (Prevention of Pollution by Garbage from Ships) Regulations SI 2020, No 621

Annex 5

UK Conformity Mark for Marine Equipment

The UK Conformity Mark must be affixed to marine equipment in accordance with the Regulations and must take the form set out below.

In any event, the UK Conformity mark for marine equipment must:

Be legible and permanently marked on the equipment which is in compliance with the Regulations;

contrast the background it is printed/ stamped etc on such that is either printed on a block white background or transparent background, providing legibility is maintained;

have vertical dimensions of at least 5mm with the ability to waive this for smaller products and/ or where the size of the conformity mark would not provide for legibility due to the size or nature of the product or it is not otherwise practicable to place the mark on the product in which case the mark should be placed on the accompanying paperwork or packaging; and

as per the Regulations, be accompanied by the identification number of the Approved Body which issues the quality assurance module of conformity (Module D, E or F) or if module G is used, the module G certificate as well as the date of affixing the mark as indicated below (where #### would be the Approved Body Number and YY the year of affixing the conformity mark).

or
####/YYYY

Annex 6

Equipment in scope of the UK-US MRA on marine equipment

Annex II to the agreement between the United Kingdom or Great Britain and Northern Ireland and the United States of America on the mutual recognition of certificates of conformity for marine equipment - Product coverage for mutual recognition

General note:

The international conventions apply in their up-to-date version. For the purpose of identifying correctly the relevant standards, test reports, certificates of conformity and declarations of conformity shall identify the specific testing standard applied and its version.

Life-saving appliances

Product item identification	UK regulations item no. in Annex 1 of MSN 1874	US technical regulations and approval guidance
Position indication lights for life-saving appliances: (a) For survival craft and rescue boats	UK/1.2a	USCG 161.101 Guidance for approval of position indicating lights for survival craft dated 11 March 1999
Position indication lights for life-saving appliances: (b) For lifebuoys	UK/1.2b	USCG 161.110
Position indication lights for life-saving appliances: (c) For lifejackets	UK/1.2c	USCG 161.112 Lifejacket light approval guidance (SOLAS) 22 March 1999
Lifebuoy self-activating smoke signals Note: expiration date not to exceed 48 months after month of manufacture	UK/1.3	USCG 160.157 Guidelines for approval of SOLAS pyrotechnic signals and line throwing appliances March 2005
Rocket parachute flares (pyrotechnics) Note: expiration date not to exceed 48 months after month of manufacture	UK/1.8	USCG 160.136 Guidelines for approval of SOLAS pyrotechnic signals and line throwing appliances March 2005
Hand flares (pyrotechnics)	UK/1.9	USCG 160.121 Guidelines for approval of SOLAS pyrotechnic signals and line throwing appliances March 2005

Product item identification	UK regulations item no. in Annex 1 of MSN 1874	US technical regulations and approval guidance
Note: expiration date not to exceed 48 months after month of manufacture		
Buoyant smoke signals (pyrotechnics) Note: expiration date not to exceed 48 months after month of manufacture	UK/1.10	USCG 160.122 Guidelines for approval of SOLAS pyrotechnic signals and line throwing appliances March 2005
Line throwing appliances Note: expiration date not to exceed 48 months after month of manufacture	UK/1.11	46 CFR 160.040 Guidelines for approval of SOLAS pyrotechnic signals and line throwing appliances March 2005 MIL-R-45505 A2
Rigid liferafts Note: The emergency pack is not covered by this agreement	UK/1.13	USCG 160.118 Rigid liferaft – Coast Guard (CG-5214) Review checklist 27 July 1998
Automatically self-righting liferafts (rigid liferafts only/inflatable liferafts not covered) Note: The emergency pack is not covered by this agreement	UK/1.14b	USCG 160.118 Rigid liferaft – Coast Guard (CG-5214) Review checklist 27 July 1998
Canopied reversible liferafts (rigid liferafts only/inflatable liferafts not covered) Note: The emergency pack is not covered by this agreement	UK/1.15	USCG 160.118 Rigid liferaft – Coast Guard (CG-5214) Review checklist 27 July 1998
Float free arrangements for liferafts (hydrostatic release units)	UK/1.16	USCG 160.162 Interim guidelines for approval and production of testing of SOLAS hydrostatic release units
Release mechanism for: (a) Lifeboats and rescue boats (launched by a fall or falls) Limited to davit launched liferaft automatic release hook	UK/1.26a	46 CFR 160.170
Release mechanism for: (b) Liferafts (launched by a fall or falls) Limited to davit launched liferaft automatic release hook	UK/1.26b	46 CFR 160.170
Marine evacuation systems	UK/1.27	USCG 160.175
Embarkation ladders	UK/1.29	USCG 160.117
Retro-reflective materials	UK/1.30	46 CFR 164.018 NVIC 2-92
Primary deck coverings	UK/3.1	46 CFR 164.106
A & B Class divisions fire integrity	UK/3.11a	46 CFR 164.105

Product item identification	UK regulations item no. in Annex 1 of MSN 1874	US technical regulations and approval guidance
(a) A class divisions		46 CFR 164.107
A & B Class divisions fire integrity (b) B class divisions Note: Restricted B class divisions are not covered by this agreement	UK/3.11b	46 CFR 164.108 46 CFR 164.110
Non-combustible materials	UK/3.13	46 CFR 164.109
Fire doors Limited to fire doors without windows or with total window area no more than 645cm ² in each door leaf Approval limited to maximum door size tested. Doors must be used with a fire tested frame design. Note: Restricted 'B' Class doors are not covered by this agreement.	UK/3.16	46 CFR 164.136
Fire door control systems components Note: When the term "system components" is used in column 1 it may be that a single component, a group of components or a whole system needs to be tested to ensure that the international requirements are fulfilled	UK/3.17	46 CFR 164.146
Surface materials and floor coverings with low flame-spread characteristics (a) Decorative veneers	UK/3.18a	46 CFR 164.112
Surface materials and floor coverings with low flame-spread characteristics (b) Paint systems	UK/3.18b	46 CFR 164.112
Surface materials and floor coverings with low flame-spread characteristics (c) Floor coverings	UK/3.18c	46 CFR 164.117
Surface materials and floor coverings with low flame-spread characteristics (f) Combustible ducts	UK/3.18f	46 CFR 164.112
Draperies, curtains and other suspended textile materials and films	UK/3.19	46 CFR 164.111
Upholstered furniture	UK/3.20b	46 CFR 164.144

Product item identification	UK regulations item no. in Annex 1 of MSN 1874	US technical regulations and approval guidance
	UK/3.20c	
Bedding components	UK/3.21	46 CFR 164.142
Fire dampers	UK/3.22	46 CFR 164.139
Penetrations through A class divisions (a) Electric cable transits	UK/3.26a	46 CFR 164.138
Penetrations through A class divisions (b) Pipe, duct, trunk etc. penetrations	UK/3.26b	46 CFR 164.138
Fire restricting materials (except furniture) for high-speed craft	UK/3.32	46 CFR 164.201
Fire resisting materials for furniture for high-speed craft	UK/3.33	46 CFR 164.201
Fire resisting divisions for high-speed craft	UK/3.34	46 CFR 164.207
C class divisions	UK/3.64	46 CFR 164.109

Navigation equipment

Notes applicable to this section

- Resolution A.102(26) and Resolution MSC.302(87) shall be considered, as applicable, for all the navigation equipment – They refer to “Code on alerts and indicators, 2009,” and to “Adoption of performance standards for bridge alert management,” respectively.
- IEC 61162 series refer to the following reference standards for maritime navigation and radio communication equipment and systems – Digital interfaces:**
 - IEC 61162-1 (2016) – Part 1: Single talker and multiple listeners
 - IEC 61162-2 Ed.1.0 (1998-09) – Part 2: Single talker and multiple listeners

High-speed transmission

- IEC 61162-3 Ed.1.2 consol. With am1 Ed.1.0 (2010-11) and am2 Ed.1.0 (2014-07) – Part 3: Serial data instrument network
- IEC 61162-3 Ed.1.0 (2008-05) – Part 3: Serial data instrument network**
- IEC 61162-3 am2 Ed.1.0 (2010-06) Amendment 1 – Part 3: Serial data instrument network
- IEC 61162-3 am2 Ed.1.0 (2014-07) Amendment 2 – Part 3: Serial data instrument network**
- IEC 61162-450 Ed.1.0 (2011-06) with am1 (2016) Part 450: Multiple talkers and multiple listeners – Ethernet connection

Product item identification	UK regulations item no. in Annex 1 of MSN 1874	US technical regulations and approval guidance
Magnetic compass class A for ships	UK/4.1	USCG 165.101 NVIC 8-01, Change 3
Transmitting heading device (THD) magnetic method	UK/4.2	USCG 165.102 NVIC 8-01, Change 3 Note: the use of ISO 11606:2000/cor1:2005 is required for acceptance for USCG approval under the MRA
Echo sounding equipment	UK/4.6	USCG 165.107 NVIC 8-01, Change 3
Speed and distance measuring equipment (SDME)	UK/4.7	USCG 165.105 NVIC 8-01, Change 3
Rate of turn indicator	UK/4.9	USCG 165.106 NVIC 8-01, Change 3
Heading control system (HCS)	UK/4.16	USCG 165.110 NVIC 8-01, Change 3
Rudder angle indicator	UK/4.20	USCG 165.167 NVIC 8-01, Change 3
Propeller revolution indicator	UK/4.21	USCG 165.168 NVIC 8-01, Change 3
Pitch indicator	UK/4.22	USCG 165.169 NVIC 8-01, Change 3
Voyage data recorder (VDR)	UK/4.29	USCG 165.150 NVIC 8-01, Change 3
Electronic chart display and information system (ECDIS) with backup and raster chart display system (RCDS)	UK/4.30	USCG 165.123 USCG 165.124 NVIC 8-01, Change 3
Universal automatic identification system (AIS)	UK/4.32	USCG 165.155 NVIC 8-01, Change 3 ITU-R M.1371-3
Track control system (working at ship's speed from minimum manoeuvring speed up to 30 knots)	UK/4.33	USCG 165.112 NVIC 8-01, Change 3
Radar reflector passive type	UK/4.39	USCG 165.160 NVIC 8-01, Change 3
