

Avengers Labs

Ukrainian platform for training AI
models for unmanned systems based
on real battlefield data

ANNOTATED BATTLEFIELD DATASET

World-leading, rapidly growing annotated battlefield dataset for autonomous target acquisition and last-mile targeting

5M+

bounding boxes from the daylight and thermal cameras

Military equipment

Tanks, artillery, air defense systems, MLRS, etc.

Civilian vehicles

Cars, trucks, motorcycles, etc.

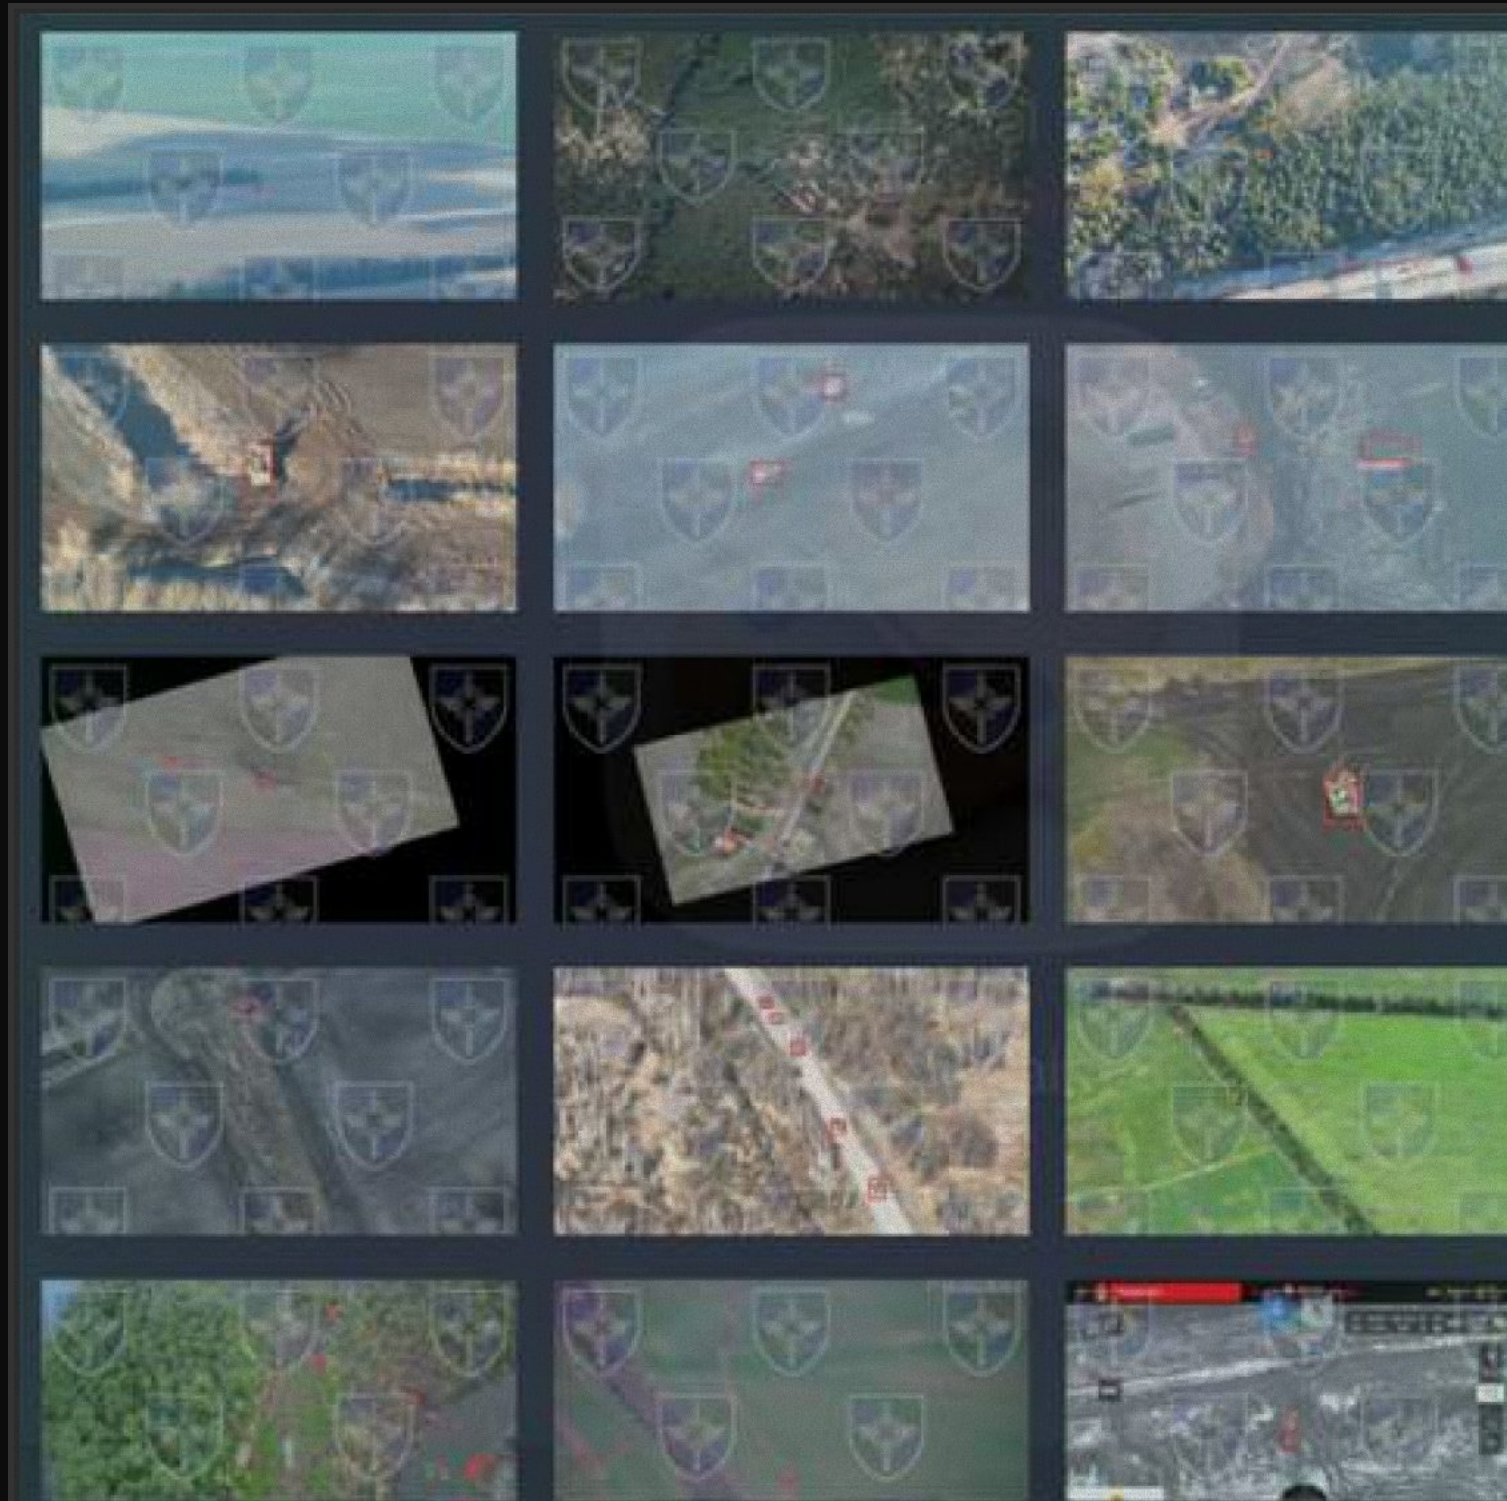

Infantry

Air targets

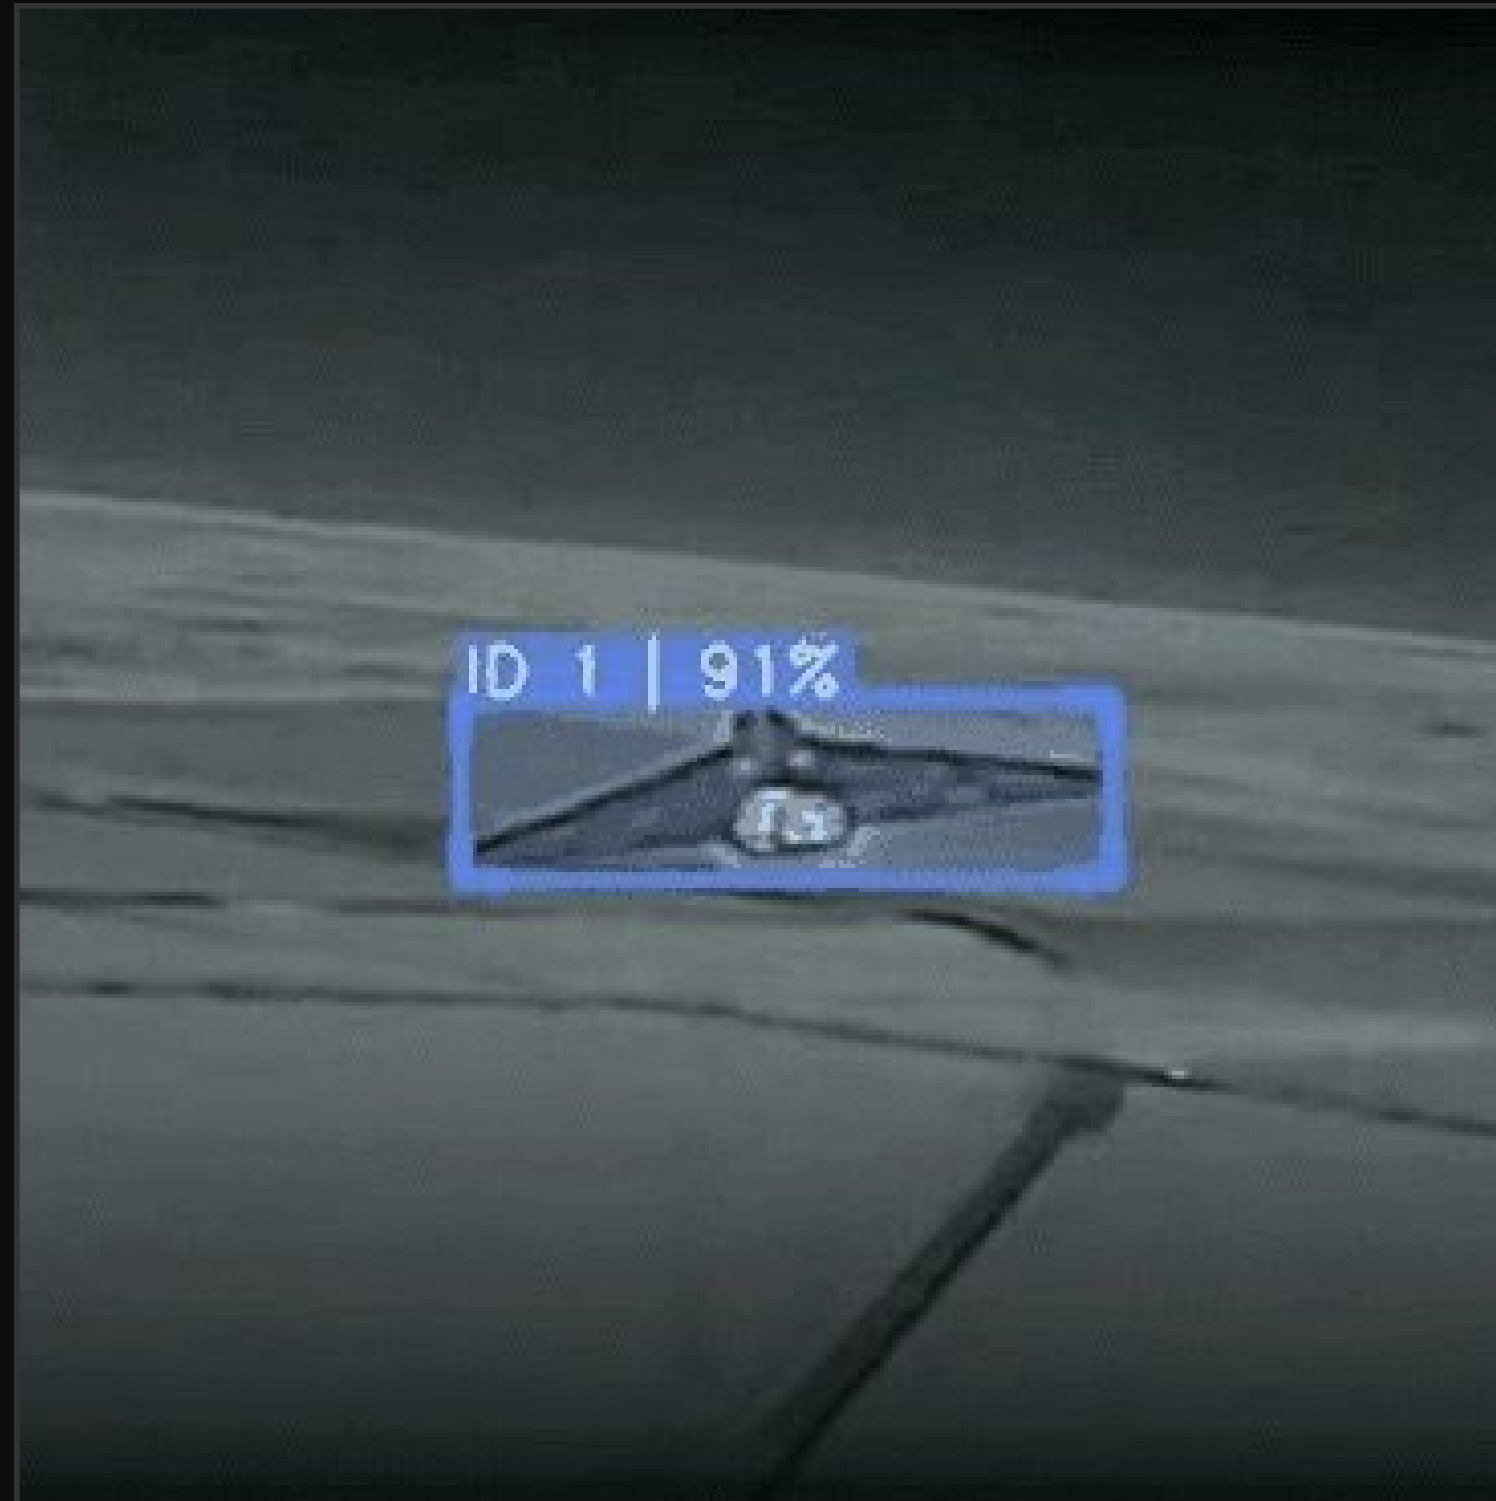

Shahed drones and ISR UAVs

FROM DATA TO DEPLOYMENT

1 Curate the data

From the enormous data pool, select what matters for your use-case.

2 Train in a secure sandbox

Bring your training pipeline, and run it in an isolated GPU-powered sandbox with production-grade MLOps tools.

3 Deploy to the edge

Pass the security review, and deploy on your own hardware.
