Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the surrender in part of an environmental permit.

Ferrybridge C Power Station ceased generating electricity on 31 March 2016. As part of the facility's phased decommissioning, most activities authorised by the environmental permit have ended, and a previous surrender application reduced the installation boundary.

No previously or currently permitted activities have taken place on the land proposed for surrender, and this application does not surrender any scheduled activities. The land is intended to be sold to enable the future widening of the adjacent Kirkhaw Lane.

Any changes made as a result of the part surrender are set out in the schedules.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
