This was on the basis that the claimant cannot surrender benefit for a past period. In UC Live Service, this could have occurred if the award was superseded from the first day of the AP in which the decision was made. This is because payments were sometimes issued before the end of the AP. In UC Full Service (Digital), payment is not made until the first day of the next AP. This means that a supersession carried out from the first day of the AP in which the decision was made, will not result in payment being surrendered for a past period.
