Case Title

Objection to a Crown Development Order for MOD Bicester Site A

Enquiry Description

Dear Secretary of State

I have today signed the petition opposing the Piddington proposal to house up to 1,250 single men from vastly different cultures and values in a small rural village. It is shocking that any government would consider placing such a large number of individuals in a community with fewer residents than those being imposed upon it. The current Prime Minister's approach of dispersing these individuals across the country only exacerbates the issue rather than addressing it. This is not what the British public has ever supported or voted for; in fact, it is the opposite of our wishes, yet successive governments have consistently ignored our voices, as does Labour.. Distributing these individuals does not ensure public safety, it merely ensures the same safety issues everywhere across the country. These men, not families or women, lack documentation to verify their identities or backgrounds, raising concerns about potential criminality. Therefore they should never be allowed to move freely, be transported into local towns, or receive phones, days-out or any other incentive to keep the pull factor to entering this country illegally. If they can afford to enter the country illegally, they should not be rewarded with additional resources, as this does not serve as a deterrent, another failure on the government's part.

It is essential to clarify that any migrant attempting to enter our country illegally/ by boat will never be considered for asylum. These men pose a risk to our communities, as we have no knowledge of their backgrounds. As for that leaflet not to rape women, children is appalling, on top of that handing out free condoms, no, they should not be out in any community where they could be sexually active. The number of violent crimes committed by individuals who have crossed into the country illegally is far too high to justify placing them in a small

community like Piddington. While it may be a minority who commit such heinous acts, even ONE rape or murder is too many and should prompt immediate government action to protect its citizens. The responsibility to secure our borders lies with the government, which they have failed to do, and continue to exacerbate the issue by placing these people all over the country. Simply replacing one form of accommodation with another is unacceptable; these individuals should be deported to a third country.

Kind regards
