Dear sirs

Having been made aware now of this formal planning application, this very small window of time is a flavour of the stealth and utter disregard of the Piddington campaign. I live in the next village 2 miles away in a rural community frightened for our safety particularly the threat of bored men terrifying our community.

It is a totally wrong place to house these immigrants. We will not be rail roaded into our lives and children being threatened by these people who should not be paid for and supported by us going forward.

They should be totally secure and treated with tough conditions not given privileges over our community.

Yours sincerely
