[redacted]

Dear whoever this concerns,
I am writing to you as I am scared.
I am a [redacted] who are growing their independence .
[redacted]
I have spent much of these past years feeling completely overwhelmed and feeling like I cannot keep my family safe.
I know that with the immigration centre opening, I cannot keep my family safe.
I am increasingly worried for my physical safety and what will be my inability to stop my family from being victims of crime. I am terrified for my children who cannot protect themselves- nor should they have to.
They must keep their innocence, play freely and feel safe.
Forever there are news reports about the immigration invasion. Bicester is becoming unsafe as tensions are growing, and politics are dividing people.
I have not joined any of the weekly protests, [redacted] attend.
I feel very strongly that British values must be suoported, a multi cultural society supported and our borders must be protected.
Uk cities and towns cannot become a no go area for locals when migrants are transported in.

People must enter the uk legally, and be deported if they do not. While they are being processed, they must be kept secure.
Our countries crime statistics are rocketing, and it's ordinary people who are paying the price.
Already I do not sleep- I'm looking at ways to make my garden and home more secure, without turning it into a prison which we may not be able to escape if men got in.
I'm thinking about where [redacted] (probably the attic) , when I need to start training them for this-and what happens if their school gets invaded .
At what point to I need to buy pepper spray or keep a hammer at close reach.
This is not an unrealistic fear, and the odds are increasing every single time you allow another boat to be escorted ashore.
I am begging you not to sacrifice this country.

I have , before children, travelled around the world, to some amazing yet dangerous places- where you don't take valuables, walk alone or go out after dark. I have had multiple experiences of being surrounded by groups of men, treated badly because

of my gender, and [redacted] There are countries I would choose not to go back to because of this.
It has always been liberating to return home- to relative safety where I can breathe easy again.

We work hard for our homes, healthcare, education and way of life.

Please do not destroy the freedom and the lifestyle that we have and cherish .
I am terrified seeing the government welcoming the boats in by their thousands.
