[redacted]

Dear Sir/Madam,

I am writing to formally object to the proposed plans to accommodate over 1,000 migrants at Site A near Piddington and Arncott.

My objections are based on several key concerns regarding the site's suitability and local infrastructure:

- Flood Risk: The River Ray runs adjacent to Site A, which sits on the edge of a well-known floodplain. Flooding in this area has worsened over recent years, and developing this land will exacerbate existing issues. The site is currently uninhabitable and has remained unused for these environmental reasons.
- Historical Precedent and Development: In the early 2000s, this site was deemed unfit for an asylum centre, and no improvements have been made to the location since. Recent housing developments in Ambrosden make the site even less suitable today. Furthermore, local pedestrian paths have not been upgraded, and street lighting hours in Piddington are being reduced.
- Infrastructure Strain: Local utilities are already overstretched. Residents frequently experience low water pressure, Ambrosden requires frequent water pipe repairs, and Arncott experienced a main burst pipe just this week.
- Isolation and Lack of Services: The location is isolated with no safe walking routes to the nearest town. Unlike larger cities, Bicester lacks the infrastructure, amenities, and public services required to support a population of this size in a rural setting.

A primary duty of government is to protect communities, maintain order, and ensure safety. Proceeding with this plan places both local residents and prospective site occupants at risk while ignoring long-standing public concerns.

I strongly urge you to reconsider these plans and reject the proposed development at Site A Bicester.

Yours faithfully,
