[redacted]

Dear Crown Casework Team,

Please find attached my formal representation regarding the proposed development at MOD Bicester Site A, reference PCU/RARE/C3105/3378843.

I am submitting this in my personal capacity as a [redacted]

I recognise both the need for suitable asylum accommodation and the importance of considering this application fairly. My objection is focused on the scale and suitability of the proposal, the evidence supporting several of its material assumptions, and whether the safeguards relied upon are sufficiently developed, deliverable and enforceable.

My principal representation is contained in the attached document. I have also attached a supporting evidence review setting out the sources and background research underlying the points raised.

In particular, I ask that the decision-maker considers the issues I have identified concerning:

* community safety and current equality duties;
* police capacity and healthcare provision;
* transport assumptions and fallback arrangements;
* evidence and lessons from comparable accommodation sites;
* infrastructure and drainage;
* ecological and protected-species information;
* the procedural chronology and justification for urgency;
* phased occupation, monitoring and enforceability of mitigation; and
* the arrangements securing cessation of the proposed temporary use.

Where adequate mitigation cannot be demonstrated, I ask that permission be refused. Where further evidence could resolve these matters, I ask that determination be deferred until that evidence has been provided and, where material, interested parties have had an appropriate opportunity to consider it.

Please place this email and the attached representation before the decision-maker as a representation made during the formal representation period.

I understand that individual representations will not necessarily be acknowledged.

Kind regards,

[redacted]
