Subject: Representation regarding proposed asylum accommodation at MOD Site A, Bicester
Date: 07 September 2026 18:28:21

Dear Sir/Madam,

I am writing to formally make a representation against the proposal to use MOD Site A in Bicester to accommodate asylum seekers.

As a local resident, I have serious concerns about the suitability of this location and the potential impact that accommodating a large number of asylum seekers at the site could have on the surrounding community.

My concerns include the following:

- **Scale and concentration:** I am concerned about concentrating a significant number of asylum seekers in one location and the potential impact this could have on the local community and public services.
- **Pressure on local services:** Bicester is already experiencing substantial population growth. Additional demand on healthcare, public services, policing and other local resources would place further pressure on services that are already serving a growing population.
- **Impact on the surrounding community:** The Government should give proper consideration to the effect that the proposed accommodation could have on residents living nearby, including residents' sense of safety and quality of life.
- **Policing and antisocial behaviour:** There are legitimate concerns about whether local policing resources would be sufficient to manage any additional demand arising from a large scale asylum accommodation facility.
- **Suitability of the site:** I question whether a former military site surrounded by established residential communities is an appropriate location for large scale asylum accommodation.
- **Local infrastructure:** Bicester has already undergone significant development and population growth. The additional demands associated with this proposal must be considered in the context of the existing pressures on local infrastructure.
- **Consideration of existing residents:** Residents who have chosen to live in and contribute to the Bicester community should not feel that a decision of this scale is simply being imposed upon them without adequate consideration of its consequences.

I want to be clear that my objection is to the proposed use of MOD Site A for asylum accommodation, rather than being directed at individuals seeking asylum.

I strongly object to the proposal and ask the Government to reconsider the suitability of MOD Site A for this purpose and to identify a more appropriate solution that does

not place the consequences of national asylum accommodation policy disproportionately on this local community.

I would ask that my representation is formally recorded and fully considered before any final decision is made.

Regards,
