Hi Guys

I am writing to object to the housing of asylum seeker's at the MOD.

I am an immigrant myself who has come in the right way and I strongly object to housing these 1200 mainly men in our community. I entered through the right channels and paid alot of money to live here and I find it rather offensive we as a country are allowing these people into the country without proper documentation, we have no idea of their criminal background, their circumstances and letting them loose in our community brings me great concern.

Myself a woman who works from home 5 days a week firstly I feel unsafe for myself and also for my female ffriends. I want to be able to continue to walk in my neighbourhood and feel safe.

Secondly, we have the Bicester Village which brings alot of money into the area. With these mainly men possibly loitering will disadvantage our local livelihoods for the community.

We have accepted afghan families into our community who we have embraced but to take 1200 mainly men will break our community, we cannot sustain this in our area.

Please do not cause unnecessary problems for our community. I'm all for people getting a chance but stop handing out freebees to people who are not going through the right processes. These people came from France a suitable country for them to stay in but they don't offer the free handouts my taxes pay for.

Please look after the English People before people breaking laws to enter this country.

Regards
