Subject: Objection to MOD site Bicester
Date: 10 September 2026 14:11:20

Dear Crown Casework Team,

I write with extreme concern to the proposed Site A Bicester MOD being used for 1,250 male asylum seekers.

The number of men, nothing to do with where they are from, it is purely because they are male, being located within our small area is absolutely terrifying for us women and children. Please , please , please, reconsider this site A for housing so many men, it is not right and will be devastating for us.

Just to say that our village [redacted] is not affluent in the slightest, we are the village [redacted], and very close to the proposed site. There are many social housing properties and shared ownership properties here. We only moved here as it is a shared ownership house and was the only place we could afford after saving for years to buy from renting, and it's a fairly shortish drive to [redacted].

There is a bus that comes 3 times a day in the week.

One little village shop.

There is a primary school 1.4 miles from proposed site.

Not very good lighting around village and very rural, even some roads have no paths.

There are lots of woodland areas, and a little park where my daughter loves to play, as do all the children from around the village.

We do not want to move , but we feel we have no choice if plans go ahead, the house prices will be lower than they should be and it will be hard to sell.

I just wanted to give a perspective from being a resident here, as an area considered on a map is difficult to assess just by looking. But I have lived here for 5 years, I have worked with absolute dedication to the NHS as a nurse for around 14 years, I have many family members from various international countries. I love everyone where every they are from. But the proposed idea as it stands currently, it is really, really worrying, as you can imagine.

As a mother, and woman, please, I am begging , PLEASE CAN YOU HELP US?

Thank you for your time.

Kind regards
Mary Blascik
