- **Site Address:** MOD Bicester (Site A), Bicester Garrison, Launton Road, Oxfordshire, OX25 1AE

To whom it may concern,

Please find below several points of objection for the planning application for the above site.

Living locally to the site I can help shed some light on how inappropriate the location is for the planned population of migrants. The location is very rural and is not easily accessible by public transport or major roads. As such what is a busy A road with no pavements which has had one death on it within recent years will be used as the only walking path to the nearest town (Bicester) at night it is even more dangerous. The lack of any street lights in the neighbouring villages and roads is worrying for a safety and security perspective.

The local community is a strong Christian one with several village churches, there is no provisions for other faith churches access to one would not be easy.

The proximity to a HM prison is also some what concerning? The ease of access to this prison and site by differing all male groups would be interesting if it took place.

Please note that due to the site being located close to a small village but the site not being secured, this would leave a non street lit rural location very vulnerable to burglary and looting. This risk of security and safety is impacting the human rights of those who have chosen to live rurally and whom may not have funds to provide increased security for their family's and property.

The emergency services are limited on a per capita basis- what

are the plans to increase these?

There is a distinct bird population that has been observed on the site, no plans for surveys has been put in place. Please note the proximity to a protected wetland area.

Local villages (blackthorn) have suffered severe flooding, there is no clear provision for the additional
Pressure a sudden influx of habitants will put on sewerage or runoff waters.

Has removal of potential asbestos been considered with no impact to the environment.

Thank you for your consideration
