To Whom it May Concern

26/01833/CROWN

I wish to raise deep concern at the government proposal to house 3,500 illegal migrants immediately adjacent to the 250resident village of Piddington in Oxfordshire.

To date there has been no risk assessment to threat, safety even life of nearby residents. I have seen no environmental assessment nor any flora and fauna investigation of the site. Further, as an ex military storage base what toxicity research has been carried out onsite prior to any works being carried out?

When there is much evidence of harm to nearby residents in the UK from asylum seekers why is the government presuming to place without local community agreement, 3,500 men thereby making the lives of 250 peaceful villages at risk? Why is the British government intending to cause such fear in the daily lives of locals through this act. This is a heinous, treasonous behaviour perpetrated by the British government and should not be given permission.

With deepest concern

Mrs Anna Pilon
Oxfordshire resident
