[redacted]

I am writing to object to the proposals by the home office to accommodate asylum seekers near the small village of Piddington.
This is totally unacceptable unless the men are contained within a compound. The villagers will not be safe. Especially women, girls and children as the people have very different cultures and religious beliefs and teachings to most of the people in the UK. This has been proven by the many atrocities carried out already by free roaming immigrants who mostly arrived in boats. For a very small community to have an influx of between 1250 and 3000 men..... All issued with condoms and a leaflet to tell them not to rape the women... Is an unthinkable situation. Who are they going to (bother) using them on?????

Unless they are permanently contained and not let out into the community, I am asking that this proposal is quashed.

The fact that the proposal has been rushed through and bypassed normal planning laws says it all.
It must not go ahead.
