[redacted]

Dear whom it may concern, my name is Abra Brash, [redacted]

For background I have recently been on the panel of survivors who were providing consultation to the Home Office to assist the National Inquiry into the Grooming Gangs. Which is currently underway. I have also provided consultation to the UN special rapporteur for violence against women and girls, I have many contacts who are very interested in this development with the situation at Bicester MoD site. [redacted] it's something I am passionate no child should ever have to endure in our lifetime or ever again. I write to you to please look carefully at the options you have and what long term consequences may be if this should go wrong. [redacted] a tiny community with tiny community infrastructure, to place a ratio of unknown males into a community is so frightening to our community and especially to me, [redacted] I believed I would feel safer here and on the whole I do and I have, there is peace and the ability to heal from past trauma and not run in to perpetrators freely or their associates [redacted] a safer environment. You have now taken that away from me and I try my hardest to feel safe and tell myself it will be ok but genuinely, how can we ever feel safe when we have no idea of the risk these males will pose to us and our children, the reason for visas in the first place is to do background checks on any one individual wanting to enter our country for leisure and tourism, this is so alarming, the fact the home office had to provide a guide on "how not to rape women" you have admitted there is the potential for massive harm to be done to communities. The office for National Statistics holds no record for undocumented male offenders and they are categorised as NFO's, from the significant cases already in the media, that is already too many cases that are heartbreaking and appalling. Especially the young mother who was a hotel worker murdered by one of said men on her way home to her child, just two train rides away from home. Please take care of this country and its tax payers and restore our faith in government taking our safety seriously, or we will in 20 years time be pushing for National Inquiry's about this very topic, and hearing in parliament again, "lessons will be learned". You must already know that we are a diverse and kind Great Britain, we wouldn't be the Country we are without the people who have come here via the correct route, with work visas or seeking asylum with proper documentation. We have Drs, midwives, nurses, social workers, teachers all from different nations we have all these people who have brought great value to us. This is not about discrimination of race, it's about our safety. Please reconsider and make the right choice.

Kind regards

Abra Brash
