My Objections to this site-
PLANNING ON HIGHWAY SAFETY

The speed past site A is 50 mph. On Friday 11th September 2026, myself and 3 villagers did a traffic survey 5am-8pm at the entrance of Site A.

Total of passing traffic was 6,921. Some speeds were greater than the speed limit.

The traffic was in convoy at times and we had to sit back from the road for our safety.

For 1,256 ??? service users to use the road will be life threatening for them and the road traffic users.

Historical facts confirm this with a fatality 300yrds from the entrance at Site A and the most recent fatality in 2024 at the Blackthorn turn.

Refer to CrashMap UK for statistics.

Yours faithfully,
Herbie Owen
