Subject: Objection to Planning Application PCU/RARE/C3105/3378843. SITE A, MOD Bicester, Bicester Garrison, Launton Rd, Oxon, OX25 1AE

[redacted]

Dear Secretary of State,

As a member of the local public I wish to object to the planning application PCU/RARE/C3105/3378843 to the proposed 1256 person asylum accommodation centre at Site A, MOD Bicester, Bicester Garrison, Oxon.OX25 1AE.

From what I understand the site is seriously lacking in the following facilities:
1. A guaranteed supply of drinking water.
2. A guaranteed electricity supply
3. The plan appears to be to construct accommodation buildings at the N.W. corner of the site which appears to flood regularly..
4. As I understand it the supply of drinking water & electricity is planned to be via generators & tankers. Possibly satisfactory for short term occupation but not long term occupation by 1256 residents.
5. How will the residents be able eo access shopping facilities in Bicester as few a likely to have their own transport certainly initially?
6.. There are limited local bus services.
7. How will medical support be provided? Our local surgeries in Bicester are already over stretched.
8. Has the impact on local nature & wild life been considered?

[redacted] I do not believe that the planned development can be approved without far more detailed consideration of the likely impact & ramifications on both the local residents & the asylum seekers have been thought through As far as I can understand these details have not been considered & certainly the general public have not been advised in detail of the ramifications of the proposed development. In short I think this plan needs much more detailed consideration before being approved. Hence my objection.

[redacted] In short I can see the necessity of providing WELL PLANNED accommodation & back up or for the asylum seekers. Most have suffered extreme hardship, many for years, & now they are or will be living in the U.K. so we must ensure that the chosen facilities are suitable.

Yours sincerely

Robert Bembridge
