You don't often get email from [redacted] Learn why this is important

Dear Secretary of

I'm writing to object to the proposed use of MOD Bicester Site A for up to 1,256 people.

My concern is with the scale and suitability of this site and with the extremely compressed process being used. Placing over 1,200 people in a rural location, raises clear questions about safe pedestrian access, transport, and the knock-on effects for surrounding villages and Bicester itself. I would like to know what additional policing is proposed,

how safeguarding and site security will operate, what monitoring arrangements will apply, and what happens if individuals can't be accounted for.

These are reasonable questions given the scale. And the government has a duty to safeguard both those accommodated and existing communities.

I'm also concerned about infrastructure pressures, including drainage, utilities, health services. And whether Bicester can realistically absorb the additional demand. A smaller proposal here was refused previously . I would like to understand what has materially changed to justify a much larger scheme.

Specialist reports have been submitted but the consultation period is so short that independent scrutiny and meaningful public engagement is near impossible consultation must mean more than just gathering responses it must allow them time to be properly examined I therefore ask that permission be refused At the very least, no final decision should be taken until all outstanding technical and community questions have been fully answered. and until there has been sufficient time for proper independent scrutiny and meaningful responses to local concerns.

Yours faithfully
