Good evening,

I would like my objection to the proposed Bicester asylum site formally recorded. The negative impact this situation has already had on my family and myself has been severe, even before the site has opened.

[redacted]

These effects are not hypothetical; they are happening now. The lack of transparency surrounding the project has intensified anxiety across our family and the wider community. People are being pushed toward ever more extreme views because they feel excluded from the decision-making process and uninformed about the risks and safeguards.

There has been no clear communication about what additional protections will be provided for the local community, especially given the concerns around unvetted residents, the scale of the site, and the inevitable tensions that will arise from protests and public opposition. This uncertainty is fuelling fear, mistrust, and division. It is also creating an environment where conflict feels increasingly likely, not because residents wish it, but because the situation is being allowed to escalate without proper engagement or reassurance.

I am asking that this objection be formally noted, and that the real-world impact on families like mine be taken seriously. The community deserves transparency, meaningful consultation, and clear plans for safety and cohesion.

Kind Regards

[redacted]
