Subject: Objection to proposed development at former MOD Bicester Site A

[redacted]

Dear Sir/Madam,

I am writing [redacted] to object to the proposed development at the former MOD Bicester Site A.

I have a lot of concerns about the proposal and the impact it would have on the local area. Adding more than 1,000 people to this site would inevitably put further pressure on the drainage system, road system, local amenities, healthcare, school system etc., especially given the amount of development already happening in the area.

However, my particular concern that I'd like to share more about is the pressure this could put on local schools. [redacted] so the availability and quality of local education is something that directly affects my family.

I am concerned that adding such a large number of people to the area could put further pressure on already limited school places and other services for local children. I would like to know what assessment has been made of the impact on local school capacity, and whether there are sufficient places and resources to accommodate the additional demand without affecting existing families.

Although the proposal is described as temporary, 10 years is a significant period of time. For families like mine, that represents a substantial part of our children's school years, so I do not think the temporary nature of the proposal should be used to minimise its impact.

It also goes without saying that the proposed development would have a significant impact on the character of the area.

I appreciate that the Government needs to find accommodation, but I strongly believe this location is not suitable for a development of this scale. All the potential implications need to be properly understood before any decision is made.

I request that the following issues are looked at in more detail:

• The impact on local school places and education provision, including whether there is sufficient capacity in local primary and secondary schools.

• The impact on local healthcare provision, including GP surgeries, dentists, pharmacies and other NHS services.

• The impact on local roads, traffic levels and existing infrastructure.

• Road safety, particularly for pedestrians, cyclists and children travelling to and from local schools.

• The capacity of local public transport and whether existing services can cope with additional demand.

• The impact on local emergency services, including police, ambulance and fire services.

• The capacity of the proposed drainage and wastewater systems and whether they are adequate for a development of this size.

• The potential impact on flooding and surface water drainage in the surrounding area.

• The impact of the development on the character and appearance of the local area and surrounding countryside.

• The potential impact on local air quality from additional traffic and activity.

• The cumulative impact of this proposal alongside the significant amount of existing and planned development in and around Bicester.

• How the site will be managed and maintained over the proposed 10-year period, including security, staffing, transport and emergency arrangements.

• What is intended to happen to the site at the end of the proposed 10-year period and whether there is a clear commitment for it to return to its previous use.

I request for my objection to be formally recorded and that the application is refused.

I would also ask that the concerns of local residents are given proper consideration when this application is determined.

Yours faithfully,

[redacted]
