Subject: OBJECTION to Urgent Crown Development Application – PCU/RARE/C3105/3378843

Dear Sir/Madam,

RE: Urgent Crown Development Application for temporary asylum accommodation at MOD Bicester Site A (Reference: PCU/RARE/C3105/3378843)

I am writing to formally object to the above-referenced development proposal at MOD Bicester Site A. As a local resident, I believe this application poses significant, unsustainable pressures on our community.

I request that the Ministry takes the following material planning objections into full consideration:

- **Infrastructure Strain:** Local healthcare, GP surgeries, and dental practices are already operating at maximum capacity. This proposal will critically overwhelm these vital public services.
- **Transport and Access:** The local road network and existing public transport links cannot safely accommodate the increased traffic and pedestrian movements associated with this facility.
- **Ecology and Environment:** The development threatens local biodiversity and risks causing detrimental impacts on native wildlife habitats surrounding the MOD site.
- **Drainage and Utilities:** The sudden increase in site density raises serious concerns regarding local wastewater management, surface water drainage, and potential flooding risks.

For these reasons, I urge the Ministry to reject this application. Please keep me informed of any updates, decisions, or further public consultations regarding this matter.

Yours faithfully,

[redacted]
