Subject: Planning Objection - PCU/RARE/C3105/3378843
Date: 16 September 2026 22:16:10

[redacted]

To whom it may concern,

I write to register my Objection to this proposed Planning Application (Ref: PCU/RARE/C3105/3378843)
This relates to the proposal for Site A, MOD Bicester, Asylum Centre

We live in extremely close proximity to this proposed site, and I would like to raise objections in relation to the following points:

SAFETY

We live on a [redacted] surrounding land is very close to Site A, MOD Bicester. There are many access points into our land, some of which we cannot make secure due to the Public Right of Way running through our land. I believe that the proposed residents in the Site A application will be allowed to come and go freely, which would mean they would legitimately have access to this Footpath and subsequently to our land and property and livestock. The route is through our main front gates, along our driveway, past our house, and then across our first back field. The thought of this potential increased number of people in the area is worrying, especially as the proposed residents will be largely unvetted or supervised.

We hav[redacted]who currently play freely in the garden and within our land without a care in the world, will possibly no longer be able to do this safely. This makes me feel extremely anxious as a parent.
Also, due to the commitments of the [redacted], sometimes my husband has to be away for work, which leaves me alone here with my children. I do feel accessible and vulnerable as a lone female, and this fear will be greatly increased should this proposal go ahead.

BUSY MAIN ROAD

We live on the main B4100. This is an extremely busy main road. There is a history of collisions and serious incidents occurring on this road. There is no footway along the most part of the road. And it is the main and only route to access the main town of Bicester or any of the surrounding villages. Living on this busy road, we have personally witnessed accidents, and I do fear for the safety of the proposed residents

of Site A should they be required to walk this road. Nobody deserves to have their life put in danger in this way. It is irresponsible.

FLOODING

Surveys done in relation to this planning application have highlighted flood risk at the site. This is absolutely true. We suffer severe flooding here every year without fail. The vast majority of our land at the rear spends significant time under water every winter. Significant changes to the local area will only make this worse. If the site goes ahead, works will need to be done to mitigate flood risk there, which would in theory push any water that would have gathered there, down to our lands and the lands on the occupants between us and Site A.

In truth, there are many more objections than these, and multiple reasons why this application is unsuitable.
We do echo the stance of Wrong Plan Wrong Site. This location is completely unsuitable.

Please would you kindly acknowledge receipt of my Objection.
And I hope to be kept informed of any further information and developments, please.

Thank you for taking the time to read and consider my concerns.

Yours sincerely,

[redacted]
