To who it my concern

I I am writing this email regarding the MOD Bicester where the government wants to open an asylum centre for 1256 men or maybe more I'm writing to say how concerned I am for all the people [redacted] I feel really uncomfortable know knowing that they would be a lot of young men maybe in groups most probably in groups hanging around because there isn't that much to do in Bicester for adults or single young men I don't believe this is the right site either considering what's been put in the document from the government regarding that there's no electricity sewage transport and a lot of other failings including the nature and animals that were around please reconsider I don't know where the right place would be particularly for these large numbers of men. I don't think anybody is going to feel that safe. I'm also concerned of the constant renewal of the men I believe which would be every few months so how is anybody going to keep this under control please refuse reconsider please do not give permission for this site to go ahead thank you. Best regards, [redacted].
