Dear Sir/Madam,

I am writing to formally object to Crown Planning Application 26/01833/CROWN, which proposes accommodating 1,250 asylum seekers at MOD Bicester Site A, OX25 2LD. I understand there are also concerns that the number could potentially increase to as many as 3,500 people.

The scale of the proposal is wholly disproportionate to the location and raises serious concerns about its impact on Bicester and the surrounding villages. These established communities already rely on limited healthcare facilities, emergency services, public transport, utilities, and other local infrastructure. Accommodating such a large number of additional residents could place significant pressure on these services, and affect the ability of local authorities and emergency services to respond effectively.

I am also extremely concerned about the potential impact on public safety, security, and the quality of life of existing residents, including families, children, and older people!! These asylum seekers are predominantly young men from a different cultural background, many of whom may not have undergone full background checks.
Accommodating such large numbers in our local community raises serious concerns about safety and the wellbeing of residents!!!

The proposal could also fundamentally alter the character of the area and place an unreasonable burden on residents who have built their lives in these communities. Bicester and the surrounding villages are valued for their residential character, community atmosphere, and quality of life.

I therefore strongly object to Crown Planning Application 26/01833/CROWN and urge the relevant authorities to reject this proposal.

Please ensure that my objection is fully considered as part of the planning process. Please also confirm receipt of my objection and provide a substantive response to the concerns raised.

Thank you.

Kind Regards
