Dear Sir/Madam

I strongly object to the planning proposal of housing 1256 un documented men on the MOD site A at Piddington.

First and foremost there is a huge safety issue.
Housing that amount of men, free to come and go, at all times directly on to an unlit fast road with absolutely no pathway. It will be an accident waiting to happen. It will be a WHEN it happens scenario rather than IF.
In winter months the FOG down that road can be particularly THICK. Also as it is a rural location ICY stretches always form in patches regardless of whether or not gritting has taken place. The last thing needed is single or groups of people wandering down the road trying to find facilities because Piddington has NONE. Car verses person is never a good outcome.

The sheer amount of males intended is way too disproportionate to the size of the village. [redacted] will not feel safe where we live and that is a very sad way to have to live our lives.

Yours faithfully
[redacted]
