Hello

I hope this email finds you all well!

I just wanted to add my thoughts on to the proposed site near me with the reference: PCU/RARE/C3105/3378843

First may I add I am in the strongest way opposed to this development. I will further add my reasons for such a response:

The amount of undocumented illegal migrant males, will outnumber the villages surrounding it greatly. This is not sensible.

Residents in all surrounding villages feel very unsafe in regards to this development. This is particularly prevalent in households with females and children living in the area.

A large concern is an increase in crime. This cannot be blindly ignored. Over 1,000 bored men, who can and will wander where they like will commit crimes. Not only will they commit crimes, they also may not share the same values as we do, evident by the leaflets recently produced by the home office telling migrant males not to commit crimes, rape women and children, or commit domestic violence. This is becomes an even larger concern at the news the men inhabiting the base can simply sign in and out as they please. It is dangerous.

Lastly we have recently heard in the news the proposed figure of around 1,200 undocumented males inhabiting the base has been largely under inflated. Recent reports suggest it could house over 3,000 undocumented illegal men. This would simply be a disaster for the local area in regards to crime, house prices, desirability of the area and safety of existing residents.

Best Regards,
