Subject:	Objection to the proposed use of the MoD site in Piddington for housing over 1200 migrants
Date:	11 September 2026 16:48:52

[redacted]

To whom it may concern,

I am writing formally object to the above proposal, this site is in a totally unsuitable area, the infrastructure & facilities that serve Piddington (& the surrounding rural villages) will not be able to cope with an increase in the population of this magnitude
The detrimental impact to the existing local communities will be significant, additional pressure on the health care system & essential & public services, pedestrian safety & increased traffic. There are no pavements near the site or any street lighting & the site entrance is on a continuously busy road with a 50mph speed limit.

Our local GP surgeries & hospitals are already overwhelmed, mental health & welfare services are failing the existing population, Police, Fire Brigade & Emergency Services will be stretched even further than they are already.

The condition of the proposed site is also an issue, it is in no fit state for accommodation, costs will be high to make it habitable, water, sewerage, waste management etc will not come cheap & the environmental impact should be considered & also the overall impact on the local residents

I am requesting that this proposal is refused as the site & surrounding area is unsuitable for the scale proposed & no evidence has been provided to prove otherwise. Please officially record my objection

Regards
R D Butler
