I do not agree with housing elegal imagrsnts in piddington or anywhere else in this country
I have brought up 2 children as careful as possible to protect them from all the dangers in the world and their is plenty. I still want to be able to sleep at night when my son and daughter are out at work having to walk to their cars at 20 at night which can be worrying enough let alone when there are added risks
I know you wouldn't understand but staff parking at Bicester village is far from where you work and in the winter not a nice walk especially when there is so much crime happening every day
Why do we feel the need to help others from different countries when we have families and homeless struggling here
Please think what you are allowing it's so scary to think who is lurking around
My anxiety is through the roof
Please don't do it send them back
